Overline Infinity

The revolutionary Laser that transforms how beauty treatments are done

The great innovation of this hair removal system is the **HD-MATRIX** technology (High definition laser) which is used to target the hair follicle, as the high definition beam of light is very uniform and does not produce dispersion.

The Laser wave is absorbed by the melanin in the hair shaft and contained in the hair follicles, it is turned into heat, increasing the temperature and triggering a natural physiological process that leads to the gradual disappearance of unwanted hair.

SPECIFICATIONS

Appliance dim. in mm L600 x D570 x H1260 • Source: Laser HRLM • wave length 808 nm • Zaffiro window dim.: mm 22x13 Large / 13x13 Regular • Emission: from 1 to 12 multi spot impulses per second • Emission: from 1 to 3 fractional single spot impulses • Impulse length defined by the sophisticated work parameter selection system in compliance with the regulations in force • Energy density max 40J/cm² max 300ms • Handpiece cooling from 5° to 15°C • 36-month warranty.

LARGE & REGULAR SAPPHIRE FOCUS

2 handpieces provided

REGULAR SAPPHIRE FOCUS OF 1200W 13 x 13 mm

Its power allows it to achieve precise action on the treatment area. Plus, a more reduced pulse amplitude, combined with the Freezing Effect system, offers more comfortable treatments.

LARGE SAPPHIRE FOCUS OF 1200W 22 x 13 mm

Innovative design with double focus makes it possible to reduce treatment times, especially on broad areas, maintaining the same efficiency, but requiring going over the same spot much less.

FREEZING EFFECT

An advanced cooling system was inserted, which turns the **Overline** diode Laser hair removal experience into a pleasant sensation of freshness and protection for the skin. Plus, cooling will no longer affect the efficiency of the handpiece, on the contrary, it will enhance the result of the progressive hair removal treatment

Overline Infinity HD Laser 1200W laser handpieces are compact, ergonomic, lightweight, reliable, functional, safe, professional and extremely handy. They have a Safety strap and Laser emission and cooling light indicators. The practical and large button was designed to facilitate different modes of use.

TECH ANALYSIS

Thanks to its powerful software *Infinity HD Laser 1200W Overline* is able to aid the operator during the first session to assess the conditions of the customer's skin and hair. By entering a few details such as phototype, hair thickness, hair colour and distribution, we are able to provide custom treatment.

UP TO 12 SPOTS PER SECOND

With a view of optimising and perfecting the performance, execution of the **Overline** Laser treatment it involves the use of the multispot method, which allows performing up to **12 spots in the fraction of a second**. All of this places the professional beautician in the condition of working safely and improving the times and efficiency of the treatment and its final result

QUICK MAINTENANCE

Thanks to the advanced research developed by **Overline**, a technology was created that essentially does not require maintenance for three years, rather, only changing water and filters and no further inconveniences.

PRE & POST MACROCAM

The Macrocam built into the Laser technology is an actual microscope with up to 200X zoom of the area being analysed. Through this tool we create a strong visual impact for the customer and we activate a real perception of the imperfection. Plus, the image is sent to our 10" display screen for better viewing and can be saved for comparison at the end of the programme.

PERFECT PERFORMANCE

Protocols and performance carried out at the Company* in compliance with the suggested work methods, confirm the synergy between the Overline technology and iSol Beauty cosmetics guarantee the maximum efficiency of the treatment.

EDUCATIONAL VIDEOS

Cutting edge in terms of service, **Overline** has always been there alongside professional beauticians to offer excellent results. We decided it would be useful to insert a number of educational videos in our equipment, designed to allow the beautician to consult, at any time, the correct operational protocols.

LASER TRAINING

Laser technologies, in compliance with the regulation in force, must be accompanied by a training course for the beautician, placing her/him in the condition to know everything about Laser technology. Every little secret will be explained so that this knowledge can be transferred to your Salon for any co-workers. **Overline** has always been careful to provide this type of regulation instructions and, for a long time, has offered its customers various types of training and preparation at any level so as to guarantee the tools to perform their work in full safety. Our responsibility is to place all professional Laser beauticians in the condition to work as correctly as possible, in full respect of their customer.

INFINITELY *Beautiful*

Overline Infinity is the innovation choice for the beauty Salon. It is the possibility of infinite customised treatments with the synergy of latest generation technologies. It features an intuitive interface and simple operation. It means effective treatments and Salon customer satisfaction. It involves on-going training support allowing every beautician to make full use of all of the potential offered by the equipment. It provides the safety of using strictly tested, certified systems built in compliance with regulations in force. It has an appealing design of sinuous lines that suits every salon.

Infinity is for those who never lose sight of their end goals!

THE DETAILS

The electronically reclining *Overline Infinity* Monitor makes programming easier and aids control over the work, offering a clear vision of the treatment, also to the customer. A large top drawer and storage compartment for materials and cosmetics, while the shaped shelf on the back of the equipment offers tidy housing for the handpieces.

Storage compartment

Large top drawer

Shaped handpiece shelf

For *Overline Infinity* the concept of customisation is very important. Every technology possesses the advanced *Contactless Card* reading system, where the sequence of each customer's treatment is entered, saving past treatments and those yet to be carried out, so as to optimise the time.

Contactless Card

36-MONTH WARRANTY
CAREFREE

Overline Infinity HD Laser 1200W equipment and its handpieces are guaranteed against materials and labour defects, ex factory, for a period of 36 months. To activate the warranty validity conditions simply fill in every section of the Warranty form inside the *Infinity HD Laser 1200W* package, and send it to Overline by and no later than 10 days from the date of purchase.

INTEGRATED COSMETICS

The duo of **Overline Infinity HD Laser 1200W** and **iSol Beauty** integrated cosmetics is synonymous with concrete solutions for all aesthetic needs and targeted results. **iSol Beauty** cosmetics are designed specifically to work efficiently with the technologies that the equipment features, for the maximum satisfaction of the beautician and an excellent beauty experience for the customer.

Cleansing
1 CLEANSING SOFT MOUSSE
ISO.FOAM.150
[150ml]
Dermo-compatible Cleanser Face&Body
2 in 1 cleanser (milk&toner) in a soft mousse, suitable for all skin types, to be used before every treatment or for daily cleansing at home with a moisturising action.

Scrub
2 JOJOBA FACE & BODY SCRUB
Gel Scrub With Jojoba Micro-Granules
ISO.SCRUB.200
[250ml]
Scrub with jojoba micro-granules that soften as the gel is applied through massage, thereby modulating the action over time. This offers high skin exfoliating performance and a smoothing and protective action. Gentle and for all skin types

Laser
3 LASER GEL
ISO.LASER.100
[4500ml]
Specific smooth gel conductor for LASER treatment with rosewater distillate
Soft soothing conductive gel enriched with precious rosewater distillate, which has soothing and toning properties. Specifically formulated for LASER treatments, it can also be used with other suitable equipment.

Laser
4 REPAIR LOTION
ISO.LASER.200
[250ml]
Repairing Soothing Spray Emulsion
Post LASER repairing soothing spray emulsion containing Betaglukane, Allantoin and Enriched Vitamin E in addition to other moisturising, softening and soothing active ingredients, like Aloe and Calendula mucilage.

Always at the service of beauticians

Cutting-edge and Innovation are the ideal terms to define **Overline**. A historical Milanese company, undisputed leader in the production and sale of hi-tech professional cosmetic equipment.

Founded in 1989 and, ever since, it can very simply be described as a “success story”. A company that expresses its business style through ethical commitment and careful and responsible commercial management.

The literature of the company uses terminology allowed at an international level, as well as being the most commonly used terms to define technologies and features

Research & Development

The beating heart of the company, the innovative Research and Development laboratory, is the place where Technologies of high performance and simple use provide effective solutions to the demands of professional beauticians. Various, safer systems that offer multiple functions for face, body and hair removal

Made in Italy

100% Made in Italy production that offers competitive advantages in terms of performance, safety and service to the customer. Overline technologies are distributed at the finest cosmetic and beauty salons across Italy and in every European country in addition to South America, Mexico, Africa and Asia.

Certifications

Overline is a trademark of Technology S.r.l., a company that constantly pursues the research and development of technologies, to offer the professional beauty market innovative systems that offer visible results, while maintaining the maximum safety of the beautician and customer. Thanks to its great experience, **Technology** possesses important certifications for compliance with regulations and international standards in the production of biomedical, electro-cosmetic and cosmetic equipment. The certifications that make all of the technologies very high level are the following:

TÜV Rheinland ISO 9001:2015. This represents the internationally recognised Quality Management System certification that ensures that the devices comply with the management system required by the standard in terms of design, production, sale, development, and research.

TÜV Rheinland ISO 13485:2016. The certification related to the Quality Management System of Medical Devices is a standard reference for Quality as part of the regulatory procedures governing the design, production and marketing of Medical Devices.

TÜV Rheinland ISO 45001:2018. Relative to the standard for the management of the health and safety of workers.
