Your actual age and environmental factors are the worst companions of the skin and are the main cause of skin aging.

**Overline élite Resolution Face Lab**, helps beauticians significantly reduce and prevent facial imperfections. The preventive analyses of the hydration level and quality of the skin provided by the equipment, respectively through the Hydration Control and the special Macrocam x200, are used to define the best treatment programme to solve or improve imperfections

The gentle and complete exfoliating action of Diamond Microdermabrasion technology, performed with the innovative diamond heads, improves skin turn-over, blood circulation and the natural production of collagen, while the treatments with Multipolar RF, Fractional RF and 3 MHz Ultrasound.

provide an effective anti-aging action, promote hydration, boost skin elasticity and regenerate it to provide a lifting effect and a young and radiant looking skin.

## Macrocam x200

Using the macrocamera **x200**, which also enables the saving of before and after images, it is possible to examine the quality of the skin in the areas of the face to be treated to establish the correct course of treatment. It is also used at the end of the treatment to check the results.

## INTUITIVE SOFTWARE

The 10-inch monitor immediately becomes an essential tool for implementing the professional's work. Its ease of use makes it a unique and ethical tool. With a few steps, the operator can carry out a 360° consultation of the customer's specific and physical condition.

The operator can consult Images, Programmes, Treatments, customer details and the status of the course of treatment and, consequently, exploit the impactful message to involve the customer in the course of treatment. Within the guided course, we also have the option to view certain videos that help clarify queries and to improve manual skills.

## Memory Card

For **Overline**, the concept of customisation is very important. Each technology has an advanced card reading system where, for each customer, the sequence of his/her treatment is entered, optimising the performance of the treatment.

## iSol.Beauty

There is no beauty without the use of specific products. At **Overline**, we define ourselves as beauty experts, with targeted products for every treatment: **iSol. Beauty**. These are not just any cosmetics, but high-concentration and skin-compatibility solutions, for both the skin and in relation to the technologies.

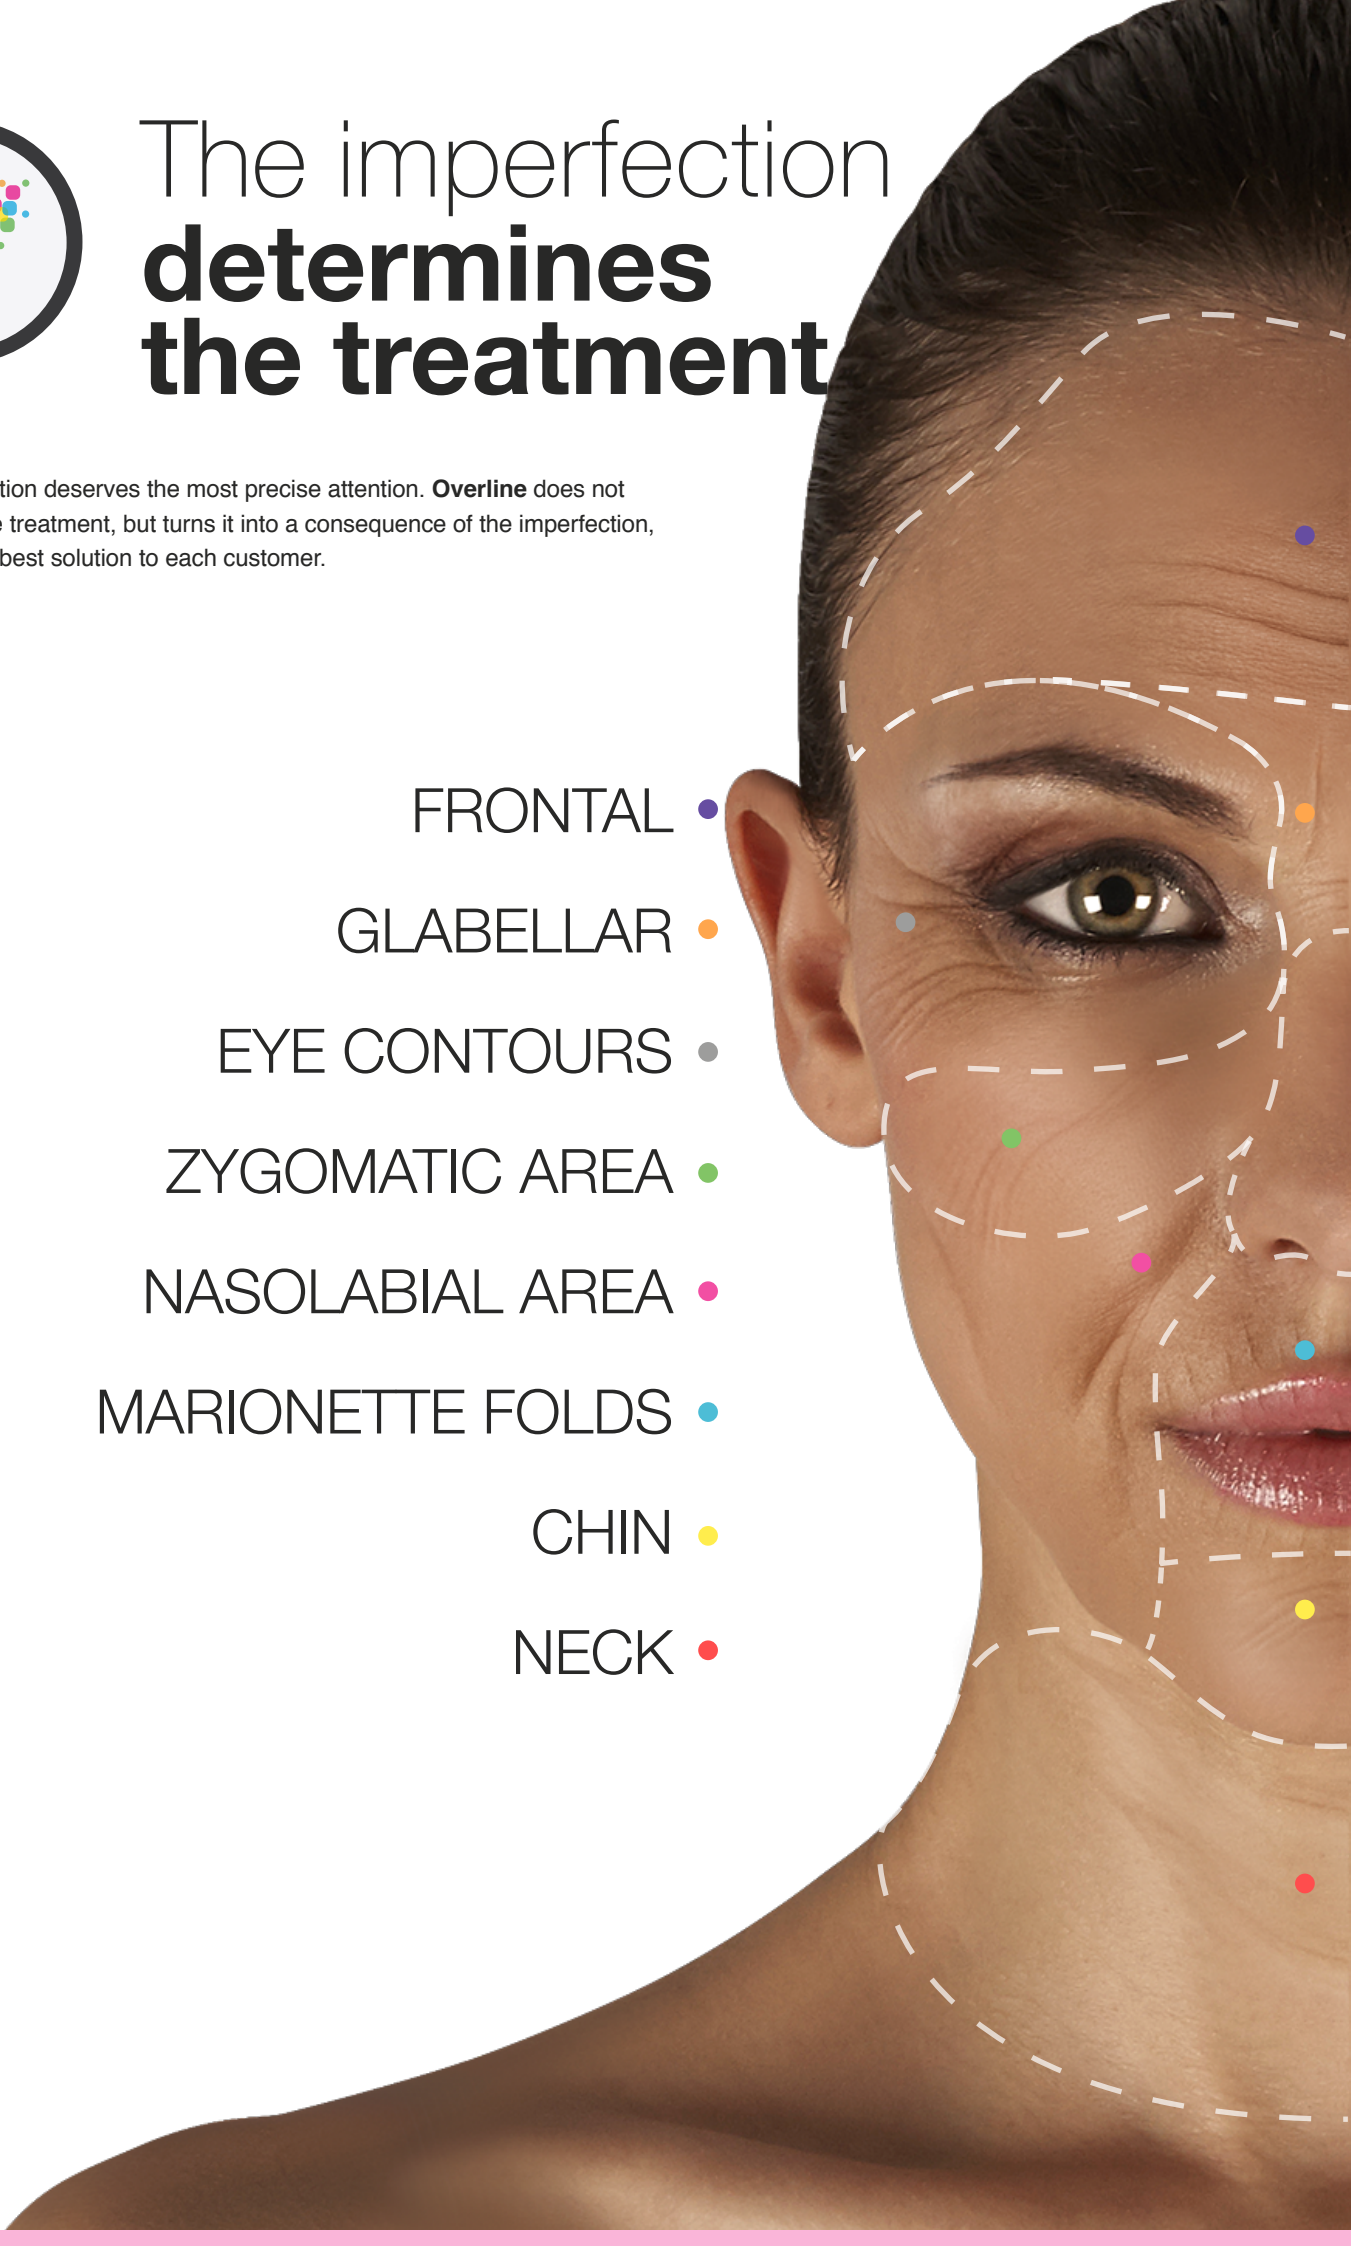

# The imperfection **determines the treatment**

Every imperfection deserves the most precise attention. **Overline** does not standardise the treatment, but turns it into a consequence of the imperfection, to propose the best solution to each customer.

# CUSTOMISED PROTOCOLS

Overline offers widely tested treatment protocols, where the technology used exalts itself with the use of iSol.Beauty cosmetics, designed ad hoc to interact perfectly with the equipment, optimising the results. Methods of certain effectiveness to meet the increasing demands of the end user. Below are some examples of how the software manages the sessions.

## Anti-Age Senior

The Software, in accordance with the rugosity check, manages the treatments in 10 repeatable sessions.

## Anti-Age Mature

The Software, in accordance with the rugosity check, manages the treatments in 7 repeatable sessions.

## Anti-Age Soft

The Software, in accordance with the rugosity check, manages the treatments in 5 repeatable sessions.

# training educational video

At the cutting edge in terms of service, **Overline** has always been supported by a professional beautician to offer an excellent result. With this certain support, the **Face Lab** has included some **Educational Videos**, designed to enable the operator to consult the correct operating protocols at any time.

Teaching videos related to the individual protocols and specific manual skills can be easily consulted thanks to the 10" (inch) touchscreen. **Overline** designed this solution to enable anyone - in the event of any forgetfulness, or the inclusion of new operators - to be able to train themselves, in order to achieve the necessary skills to offer and guarantee the customer the best service.

# visible results actually tested

No words, just solid facts. Non-clinical tests performed\* confirm that the synergy between **Overline** technology and **iSol**. Beauty cosmetics ensures maximum treatment effectiveness, respecting the suggested working protocols.

Use of technology without cosmetic product 100%
