NEW BODYSUITS
DRAINING
REDUCING

*élite Resolution Warm & Pulse Massage is the innovative equipment by **Overline** for slimming the silhouette, using the synergy between heat and Press Massage, enhancing the benefits and aesthetic effects of both. The only system of its kind, a great novelty for the aesthetic sector. The effects of the **Overline** Press Massage are widely known. Its bodysuits and jacket with progressive inflation and overlapping internal air chambers, prevent the veno-lymphatic return, simulating the passage of the hands ensuring a uniform massage.*

*The **Overline** innovation is in combining the Press Massage to the slimming action of heat, a great combination that enhances the treatment, making it more effective and more comfortable. The final result of *élite Resolution Warm & Pulse Massage* is the progressive decrease of the circumferences, thanks to the reabsorption of the oedematous status and improvement of venous-lymphatic circulation. The muds and bandages **iSol**, designed ad hoc for treatments with **Overline** equipment, have an important complementary action.*

**PRESS
MASSAGE**
Revitalizing Action

Press Massage contributes to the restoration of veno-lymphatic functions, improving the peripheral circulation. It has a draining effect, reducing swelling and muscle tension. It has an important detoxifying, revitalizing effect too, enhances the oxygenation of tissues and prevents the formation of cellulite *. This treatment is very relaxing and generates a sense of well being and lightness.

**SUPER SILENT
TECHNOLOGY**

This apparatus is equipped with a new generation engine that makes the treatment silent and your work more efficient over time, with a life of 2500 hours, equal to 5000 treatments.

**6 general body programs
(for 12 sectors equipment)**

These treatments allow to work simultaneously on lower and upper limbs. Programs are diversified according to single needs and customer problems.

12 legs programs

8 sectors treatments that work on lower limbs. Programs are diversified according to single needs and customer problems.

4 arms programs

(optional armsuits for 8 sectors version)

Upward peristaltic treatment with 4 sectors that encourages the elimination of liquids, while reshaping the treated part.

**PULSE
MASSAGE**
Draining Action

The new PULSE system of elite Resolution Press Massage was created by the scientific laboratories Overline in order to make the drainage/massage treatment, performed by the equipment, more comfortable and more similar to a manual massage. The PULSE technology uses a computer system and managed by Resolution Press Massage, able to carry out a pulsed and continuous pressure in each sector.

The pulsed and intermittent pressure creates a high stress, improving the effects of the Press Massage treatment. The stimulating action of subcutaneous tissue improves the muscle contractility and metabolism, acting consequently on the arterial circulation and activating a natural drainage mechanism.

**PRESS
WARM**
Reducing Action

Heat generates pleasant and real beneficial effects on the body such as the increase of microcirculation with consequent improvement of interstitial exchanges and improvement of local metabolism. The increased metabolism has a trophic action, ie tissue nourishment, but also oxygenation, which acts effectively on imperfections caused by cellulite. The mechanism of exchange and activation of (local) metabolism is able to enhance detoxification. Finally, heat has important properties of activation of ingredients contained in Muds and specific Bandages iSol.

**MODELING
PHYSIOSTIMULATION**
Tonifying Action

The shaping Physiostimulation uses frequencies ranging from 30 to 80 Hz. Ideal for an invigorating action recommended for those people with sagging tissues, this treatment acts on the entire length of the muscles, keeping skin elastic, stimulating the lymph flow in order to improve its transit, helping to release congestions created, further accelerating the outflow.

Shaping treatment: preparation phases

The bands for Physiostimulation are applied over iSol bandages, with moisturizing, tonifying, anti-cellulite, slimming and draining effect.

Presso UPGRADE YOU ARE CREATING YOUR EQUIPMENT

Overline always thinks of increasing the work of professional aesthetic operators. Unfortunately, very often each of them has its own way of making aesthetics and would like "Her Technology": for this reason, thanks to the efforts of our laboratories, we have decided to offer the possibility of purchasing a basic equipment and then, based on individual needs, upgrade and improve it under different points of view and particularly based on the needs of your beauty center. You will no longer have the problem of having a device that you like but only half-way because you don't use all the functions, with Presso UPGRADE you can do whatever you prefer.

TAKE CARE OF YOUR WORK DON'T WORRY ABOUT THE REST, OVERLINE IS THERE FOR YOU

Overline devices are guaranteed by defects in material and workmanship, ex-works, for a period of 36 months according to the General Conditions of Sale*

The new Press Massage bodysuits are divided into feet, legs, undergarments with lymph node slits, and a side-adjustable bodice; sections concerning the arms start from the hand and are divided into 4 sectors, with a specific chamber for lymph nodes underarm. Bodysuits are adjustable in height and around the perimeter of legs and arms, with interchangeable inner air chambers.
