CLEANSING SOFT MOUSSE

Dermo-compatible Cleanser for face&body

Innovative cleanser 2 in 1 (milk&toner) in a soft mousse, suitable for all skin types, to be used before every treatment or for daily cleansing at home with a moisturising, soothing action in full respect of the PH.

MAIN ACTIVE INGREDIENTS

Extremely gentle, dermo-compatible and clinically tested surfactants (*Coceth-7, PPG-1-PEG-9 lauryl glycol ether, PEG-40 hydrogenated castor oil*) - Dermo-compatible and clinically tested, they gently cleanse the skin, leaving it exceptionally soft to the touch. They do not contain Alkyl sulfates (SLS/SLES), Betaines.

Mallow Mucilage (*Malva sylvestris (Mallow) flower/leaf/stem extract*) - Particularly suitable for products for dry and irritated skin, thanks to its film forming, soothing and softening properties. Protects skin against irritation.

Calendula Mucilage (*Calendula officinalis flower extract*) - Has a softening and protective, refreshing and moisturising effect.

Moisturising micro-ingredients (*minerals, sugars, glycerine sorbitol*) - This is an innovative active ingredient with a super moisturising action with controlled release of the micro-ingredients on the skin, increasing the moisturising effect and facilitating penetration.

Lactic Acid - This is an alpha hydroxy acid (AHA) with an exfoliating action. It stimulates the skin to regenerate, promoting skin cell renewal. It normalises pH of the skin

Professional use & Home treatment

ISO.FOAM.150

150ml • Net Wt. 5.1 fl oz.

TECHNOLOGIES TO USE IN COMBINATION

Cleansing mousse suitable for cleansing the skin before using all technologies or as a preparatory cleanse for cosmetic treatment.
Suitable cleanser for all skin types.

The Dermo-compatible Formula makes it perfect for pre-laser skin cleansing and for maintenance at home throughout the journey..

USE

In cabin - Pre-treatment face cleansing, suitable for all skin types. Cleanse with the mousse by massaging with your hands, eliminate any residue using water or a damp soft cloth.

In cabin - Pre-treatment body cleansing, suitable for all skin types. Cleanse with the mousse by massaging with your hands, eliminate any residue using water or a damp soft cloth.

Application - In cabin before each treatment. At home: daily cleansing morning and evening.

At home - Precious daily Cleanser in the same 150ml format, for home use, suitable for all skin types.

Ingredients: Aqua (Water), Sodium cocoamphoacetate, Glycerin, Lauryl glucoside, Calendula officinalis flower extract, Malva sylvestris (Mallow) flower/leaf/stem extract, Laminaria digitata extract, Lactic acid, Sodium cocoyl glutamate, Sodium lauryl glucose carboxylate, Diatomaceous earth, Sodium chloride, Sorbitol, Lecithin, Xanthan gum, Tetrasodium EDTA, Parfum (Fragrance), Imidazolidinyl urea, Magnesium nitrate, Magnesium chloride, Methylchloroisothiazolinone, Methylisothiazolinone.

JOJOBA FACE&BODY SCRUB

Gel scrub with jojoba micro-granules

Exfoliating scrub with jojoba micro-granules that gradually soften as the gel is applied through massage, thereby modulating their action over time. They provide high skin exfoliation performance and a smoothing effect in addition to being protective and moisturising. Non aggressive, can be used on all skin types for deep cleansing.

MAIN ACTIVE INGREDIENTS

Jojoba Micro-granules (*Jojoba esters*) - They are an optimal size (40/60 micron), they offer high skin exfoliation performance and a smoothing effect. They have acicular or pointy surfaces that gradually soften as the gel is applied through massage, thereby modulating their action over time.

Calendula Mucilage (*Calendula officinalis flower extract*) - Has a softening protective, refreshing and moisturising effect.

Mallow Mucilage (*Malva sylvestris (Mallow) flower/leaf/stem extract*) - Particularly suited for dry and irritated skin, thanks to its film forming, soothing and softening properties. Protects skin against irritation.

Professional use & Home treatment

ISO.SCRUB.200

250ml • Net Wt. 8.5 fl oz.

TECHNOLOGIES TO USE IN COMBINATION

Gentle Scrub suitable for the preparation for all face&body treatments with technologies.

The gel formula with Jojoba micro-granules makes it the perfect scrub for pre-laser preparation and for home maintenance during the entire process.

USE

In cabin - Gentle pre-treatment face scrub, suitable for all skin types.

In cabin - Gentle scrub also ideal on the body as preparation of the skin before applying technologies or specific treatments.

Application - In cabin before treatment to prepare the skin, also suitable as Pre-Laser Treatment. Can even be used weekly.

At home - Precious maintenance during the Laser treatment or as a gentle face and body Scrub to be used weekly, for radiant and moisturised skin. 250ml Format.

Ingredients: Aqua (Water), Glycerin, Jojoba esters, Calendula officinalis flower extract, Malva sylvestris (Mallow) flower/leaf/stem extract, Carbomer, Triethanolamine, Tetrasodium EDTA, Parfum (Fragrance), Coceth-7, PPG-1-PEG-9 lauryl glycol ether, PEG-40 hydrogenated castor oil, Imidazolidinyl urea, Magnesium nitrate, Magnesium chloride, Methylchloroisothiazolinone, Methylisothiazolinone, Chromium hydroxide green (CI 77289).

ENZYMATIC PEELING

Gentle enzymatic exfoliant

Reactivating treatment for healthy and radiant skin. A complex of concentrated natural enzymes working synergistically for the gentle renewal of the skin texture.

MAIN ACTIVE INGREDIENTS

Dipeptide-3 - Promotes the natural renewal process of skin cells for smoother, more radiant and more compact skin, improving its quality and reducing the signs of ageing.

Lemon (*citrus medica limonum (lemon) extract*) - Exfoliates the horny layer, with strong properties mineralizing, vitaminizing, moisturizing.

Strawberry (*fragaria vesca (strawberry) extract*) - Purifying, Vitaminising, it offers radiance to the skin, countering the signs of ageing.

Kiwi (*actinidia chinensis (kiwi) fruit extract*) - Anti-oxidant, Purifying, Sebum-balancing, Refreshing

Mango (*mangifera indica (mango) extract*) - Has anti-oxidant properties and fights free radicals responsible for skin ageing, it is emollient and repairing as it provides a skin regenerating action.

ISO.DER.300

Home treatment

ISO.BIOCELL.100
[5 X 20 ml]

Professional use &
Home treatment

ISO.BIOCELL.200
[5 X 20 ml]

TECHNOLOGIES TO USE IN COMBINATION

Preparation of the skin (monthly), pre-technology

Deep cleansing of the skin (monthly) crucial before the aesthetic/cosmetic treatments.

USE

In cabin - Enzymatic peeling can be used as preparation for treatments. This creates a gentle exfoliation, giving the skin greater permeability.

1- Soak 2 cotton pads with the product and rub gently over the face, neck and décolleté.

2- No rinsing required. Make sure that the skin is dry before starting the treatment, to aid the abrasive action of the heads.

3- Enzymatic peeling can be used once a week.

Ingredients: Aqua (water), fragaria vesca (strawberry) extract, carica papaya fruit extract, mangifera indica (mango) extract, actinidia chinensis (kiwi) fruit extract, citrus medica limonum (lemon) extract, hydroxyethylcellulose, phenoxyethanol triethyleneglycol, hexanoyl dipeptide-3 norleucine acetate, edta, lactic acid, c.i. 19140, c.i. 16255.

Dermatologically tested

TRI-ACID EXFOLIANT PEEL

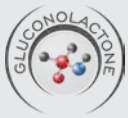

Deep exfoliating peeling - Regenerating and Antioxidant

Innovative acid pH peeling (pH 3-3.5) based on the latest generation of Polyhydroxy acids that renews, deeply purifies and smoothes the skin leaving it soft and well cleansed. The exfoliating power of Lactobionic Acids and Gluconolactone helps eliminate dead cells favoring the cellular turn over while Ferulic Acid, known for its antioxidant properties, contributes to maintaining a youthful appearance. Also suitable for the most sensitive skin.

MAIN ACTIVE INGREDIENTS

Lactobionic acid (*Lactobionic acid*): promotes gentle exfoliation and cell renewal, modulating the keratinization process. The gentle slow absorption makes it better tolerated by sensitive skin. In addition, it has anti-oxidant and soothing properties and has a stimulating effect on collagen production.

Gluconolactone (*Gluconolactone*): promotes exfoliation by modulating the keratinization process and stimulating skin renewal. Gluconolactone has a strong hygroscopic and long-term moisturizing power, thanks to the presence of numerous hydroxyl groups. It also has good antioxidant properties and restores the damaged skin barrier. Unlike the most common chemical exfoliants it is non-irritating and does not induce photosensitization.

Ferulic acid (*Ferulic acid*): phytochemical present in the seeds and leaves of many plants (rice, oats, wheat). Thanks to its particular chemical structure it has a high antioxidant power. Reduces the negative effects of many external agents or too aggressive products, counteracting dryness, irritation and redness. In addition, it promotes the synthesis of collagen and elastin while maintaining the natural elasticity and firmness of the skin.

SUPPORTING PRODUCTS

3D Hyaluronic Serum

Professional use

ISO.SERUM.450
[30 ml]

Concentrated moisturizing, restorative and anti-age serum applicable after each treatment with facial technologies.

TECHNOLOGIES TO USE IN COMBINATION

Deep peeling suitable for skin preparation to the paths of facial treatments with technologies.

Deep cleansing of the skin, essential before aesthetic / cosmetic treatments.

USE

In cabin

1. Apply the Peeling gel on the face with a brush.
2. Dab gently with the palm of your hands using gloves.
3. Leave on for 5 minutes in case of sensitive skin, 10 minutes in case of normal or oily skin.

4. For an intensive effect gently massage the gel with your fingertips for about 1 minute.

WARNING: Only carry out this last option after testing the product at least once with traditional use as described above.

5. After the exposure time proceed to rinse the product with plenty of warm water, without massaging but gently dabbing.

Ingredients: Aqua, Lactobionic acid, Gluconolactone, Hydroxyethylcellulose, Sodium hydroxide, Caprylyl glycol, 1,2-Hexanediol, Ferulic acid, Tropolone.

FACE ACTIVE GEL ULTRASOUND

Face Ultrasound Conductive Gel

Face gel specific for Ultrasound treatment. Rich in active principles, it gives skin a smooth and hydrated appearance. It allows excellent vehiculation of the Ultrasound waves in the skin layers.

MAIN ACTIVE INGREDIENTS

Hyaluronic acid with high (Sodium hyaluronate) and very low molecular weight (10kDa) (Hyaluronic acid) - The high molecular weight acts on the surface, guaranteeing effective hydration and film-forming action, bonding with the stratum corneum with a firming effect. Low molecular weight, going deep into the skin, stimulating the physiological production of proteins specifically for skin compactness and elasticity.

Yarrow (Achillea millefolium extract) - anti-inflammatory, astringent, firming, anti-reddening properties.

Marine Chamomile Extract (Tripleurospermum maritima extract) - Functional active ingredient of marine origin. It performs a micro-relaxing action as well as an anti-radical and anti-wrinkle action. Stimulates the synthesis of collagen and glycosaminoglycans

Echinacea Extract (Echinacea angustifolia extract) - It has a restorative action, elasticizing, toning and antiseptic.

ISO.GEL.105

Professional use

150ml • Net Wt. 5.1 fl oz.

TECHNOLOGIES TO USE IN COMBINATION

**Face Ultrasound
3MHz**

**25kHz Face
Ultrasound**

In-cabin face treatments with all of the technologies that require the use of a conductive gel, rich in active ingredients.

USE

In cabin - apply a generous layer of conductive gel on the face with a brush, then continue with the treatment with the technology.

Leave-on time - the Ultrasound treatment will last approximately 20 minutes. 1 weekly session recommended.

Ingredients: Aqua (Water), Tripleurospermum maritima extract, Palmitoyl hexapeptide-19, Hyaluronic acid, Maris sal (Sea salt), Achillea millefolium extract, Echinacea pallida extract, Hydrolysed vegetable protein, Acacia senegal gum, Glycerin, Propanediol, Hydroxyethylcellulose, Xanthan gum, Tetrasodium glutamate diacetate, Citric acid, Phenoxyethanol, Ethylhexylglycerin.

HYDRA LIFT SERUM ANTI-AGE

Anti-Age Lifting fluid serum

Concentrated fluid serum with hydrating, nourishing and anti-age properties, suitable for the treatment of mature skin, the formula is designed to optimise the benefits of Ultrasound and Ionophoresis, providing a synergistic action with the equipment.

MAIN ACTIVE INGREDIENTS

Moisturising micro-ingredients (*minerals, sugars, glycerine sorbitol*) - An innovative mix of active ingredients performing (performing è per non mettere due volte with a super moisturising action with controlled release of the micro-ingredients onto the skin, increasing the moisturising effect and facilitating penetration.

Seaside Chamomile Extract (*Tripleurospermum maritima extract*) - Provides a calming, anti-reddening and soothing action.

Calendula Mucilage (*Calendula officinalis flower extract*) - Offers an anti-inflammatory, soothing, hydrating and nourishing action.

Hyaluronic acid - Provides anti-age, hydrating, soothing and smoothing action. It gives skin a younger and more relaxed appearance.

Kigelia (*Kigelia africana fruit extract*) - this counters skin sagging and prevents the relaxation of tissues. It has a toning, firming and elasticising action on the skin, skin of the body, breast, face and décolleté, also reduces the stretch marks.

Horse chestnut Extract (*Aesculus hippocastanum (Horse chestnut) extract*) - With anti-reddening, soothing, strengthening and vasoprotective action.

LIGHTENING SERUM

Illuminating Lightening fluid serum

Concentrated fluid serum with lightening and illuminating properties, suitable for the treatment of dull or spotted skin, the formula is designed to optimise the benefits of Ultrasound and Ionophoresis, providing a synergistic action with the equipment.

MAIN ACTIVE INGREDIENTS

Synergistic complex of fruit acids, oligosaccharides and urea (*Glycolic acid, Malic acid, Tartaric acid*) - intervene in processes of renewal of the stratum corneum accelerating cell turnover with resulting in increased vitality of the layers of the skin. They increase the brightness of the skin, improve the hydration and elasticity of the stratum corneum.

Bearberry Extract (*Arctostaphylos uva ursi leaf extract*) - Plays a lightening action, due to the competition of the arbutin it contains, for binding with receptors of the enzyme tyrosinase, responsible for the formation of melanin.

Vitamin C micro-lipids (*Sodium ascorbyl phosphate*) - This has an inhibiting effect on melanogenesis, it protects against phototoxicity and stimulates collagen synthesis. Its micro-lipid form has a similar structure to cell membranes, it prolongs its bioavailability, it offers better absorption and diffusion on the skin.

Licorice Extract (*Glycyrrhiza glabra (Licorice) root extract*) - This helps provide a lightening action by inhibiting the tyrosinase enzyme.

Aloe Extract (*Aloe barbadensis extract*) - Rich in vitamins, it has a hydrating, regenerating, anti-age effect.

PURE REBALANCE SERUM

Rebalancing - Detoxifying fluid serum

Fluid serum with detoxifying and rebalancing properties, suitable for the treatment of oily or asphyxiated skin, the formula is designed to optimise the benefits of Ultrasound and Ionophoresis, providing a synergistic action with the equipment.

MAIN ACTIVE INGREDIENTS

Laminaria sac-charina extract - A special algae that provides a sebum-regulating action, that inhibits lipase (the enzyme that breaks down triglycerides in free fatty acids leading to the multiplication of bacteria and inflammatory processes) and regulates hydration.

Witch-Hazel Extract (*Hamamelis virginiana leaf extract*) - Known for its revitalising and toning action that also stimulates micro-circulation.

Italian Strawflower Extract (*Helichrysum italicum extract*) - Provides a skin-purifying, re-balancing and soothing action.

Burdock Extract (*Arctium lappa root extract*) - Offers a cell regenerating, astringent and skin-purifying action.

Dermatologically tested

3D HYALURONIC SERUM

Concentrated serum with hyaluronic acid of 3 molecular weights

Precious and innovative gel formula based on hyaluronic acid, in which hyaluronic acid is obtained with a particular process of fragmentation that makes it very bioavailable. It contains three different types of hyaluronic acids with different molecular weights and chemical structures for a triple effect:

- **MOISTURIZING**, thanks to high molecular weight hyaluronic acid;
- **ANTI-AGING**, thanks to low molecular weight hyaluronic acid;
- **RESTRUCTURING** in depth, thanks to the combination of hyaluronic acid and organic silicon.

Just a few drops of this precious fluid and the face immediately acquires hydration and shine. A repairing concentrate, plumping. Ideal for counteracting wrinkles, loss of elasticity and hydration, dull complexion and signs of fatigue.

MAIN ACTIVE INGREDIENTS

1 • High Molecular Weight Hyaluronic Acid (*Sodium Hyaluronate*): the size, between 1800 and 3000 kda (kilo Dalton), does not allow it to pass through the skin, this however allows the molecule to act on the surface exerting a moisturizing action, film-forming and plumping. When applied to the skin, it therefore forms a thin film that keeps it smooth and hydrated.

2 • Low Molecular Weight Hyaluronic Acid (*Hyaluronic Acid*): due to its increased penetration capacity in the epidermis, this type of hyaluronic acid is valuable to the skin, manages to reach the deepest layers and to plump and nourish the natural reticulum already present, exerts anti-wrinkle action and stimulates the physiological production of proteins responsible for skin firmness and elasticity.

3 • Hyaluronic Acid and Silicon (*Hyaluronic Acid - Silanetriol*): combination of hyaluronic acid with low molecular weight and organic silicon, with restructuring and anti-aging action. Silicon is an essential component of the skin, over the years its share is reduced progressively, with loss of tone and firmness; its daily topical application improves the elasticity and epidermal structure.

OXYSERUM SENSITIVE AGE TRIPEPTIDE

Concentrated serum with stem cells

Innovative serum containing Argan Oil, rich in vitamin E and fatty acids with antioxidant and hydrating properties, with active oxygen incorporated. In a gradual and controlled manner, the active oxygen is released topically where it is able to aid the natural skin renewal process. The serum contains innovative active ingredients which include: TRI PEPTIDE, which imitates the action of a functional molecule (Waglerin 1) found in temple viper snake venom.

MAIN ACTIVE INGREDIENTS

Ozonized Argan Oil (*Ozonized argania spinosa oil*) - The fundamental and functional active ingredient of the serum that activates tissue oxygenation [see introductory description].

Acetyl Tetrapeptide-15 - Reduces nerve response to external stimuli (accentuated in sensitive skin). It increases the skin tolerance threshold.

Tri-peptide (*Dipeptide diaminobutyroyl benzylamide diacetate*) - of synthetic origin, it imitates the action of a functional molecule (Waglerin 1) found in temple viper snake venom. It is able to lessen expression lines by reducing muscle contractions.

Palmitoyl hexapeptide-19 - this helps relax the fibres of the facial muscles thanks to its capacity to interfere with the SNARE complex. This complex is responsible for the contraction of the facial muscles that cause expression lines to develop.

Calendula Mucilage (*Calendula officinalis flower extract*) - It offers an anti-inflammatory, soothing, hydrating and nourishing action.

OXYSERUM ANTI-AGE STAMINAL

Concentrated serum with stem cells

Innovative serum containing Argan Oil, rich in vitamin E and fatty acids with antioxidant and hydrating properties, with active oxygen incorporated. In a gradual and controlled manner, the active oxygen is released topically where it is able to aid the natural skin renewal process. The serum contains active ingredients including stem cells obtained from Grape, that preserve the skin's vitality and perform a nourishing, anti-wrinkle and antioxidant action. Hyaluronic Acid Liposomes with filler action.

MAIN ACTIVE INGREDIENTS

Ozonized Argan Oil (*Ozonized argania spinosa oil*) - The fundamental and functional active ingredient of the serum that activates tissue oxygenation [see introductory description].

Hyaluronic Acid Liposomes (*Hyaluronic acid*) - Hyaluronic Acid in liposomes promotes vehiculation through the skin, conferring volume and providing, a moisturising, smoothing and restructuring action.

Plant Stem Cells from Grape (*Vitis vinifera (Grape) callus culture extract*) - These provide important nutrients crucial to protecting and maintaining the function and ensuring the longevity of human stem cells. They preserve the vitality of the skin and perform a nourishing, anti-wrinkle and anti-oxidant action.

A mix of high (*Sodium hyaluronate*) **and low** (*Hyaluronic acid*) **hyaluronic Acid molecular weight** - Hyaluronic acid with high molecular weight offers a strong hydrating effect, it imbibes the stratum corneum with water causing the inter-corneocitary space to dilate. This leads to an increased penetration of the low weight molecule due to the effect of passive diffusion.

Aloe (*Aloe barbadensis extract*) - Rich in vitamins, it has a hydrating, regenerating, anti-age effect.

Ginseng (*Panax ginseng root extract*) - It is known for revitalising and toning action, and stimulating effect on micro-circulation.

RESOLUTION AGE LIFT FILLER

Anti-Age filler effect serum

Special Filler effect serum with liquid crystals designed for the treatment of Electroporation on mature skin, the precious active ingredients provide radiance and elasticity while electroporation allows the vehiculation of the functional substances

MAIN ACTIVE INGREDIENTS

Hyaluronic acid - Hyaluronic acid provides an anti-age, hydrating, soothing and smoothing action. It gives skin a younger and more relaxed appearance.

Aloe Extract (*Aloe barbadensis extract*) Rich in vitamins, it has a hydrating, regenerating, anti-age effect.

Marine Chamomile Extract (*Tripleurospermum maritima extract*) - Functional active ingredient of marine origin. It performs a micro-relaxing action as well as an anti-radical and anti-wrinkle action. It stimulates collagen and glycosaminoglycan synthesis.

Witch-Hazel Extract (*Hamamelis virginiana leaf extract*) - Known for its action revitalizing, toning and stimulating the microcirculation.

RESOLUTION PURE REBALANCE

Rebalancing - detoxifying serum

A special Serum with liquid crystals designed for the Electroporation treatment of blemished skin with rebalancing properties, the precious active ingredients a sebum-balancing and hydration reducing the typically shiny appearance of oily skin. Electroporation allows the vehiculation of the functional substances.

MAIN ACTIVE INGREDIENTS

Laminaria saccharina extract (*Laminaria saccharina extract*) - A special algae that provides a sebum-regulating action, that inhibits lipase (the enzyme that breaks down triglycerides in free fatty acids leading to the multiplication of bacteria and inflammatory processes) and regulates hydration

Burdock Extract (*Arctium lappa root extract*) - This offers a cell regenerating, astringent and skin-purifying action

Hamamelis Extract (*Hamamelis virginiana leaf extract*) - Known for its action revitalizing, toning and stimulating the microcirculation.

Complex of vitamins B5, B6, H, PP, Yeast protein (*Panthenol - Pyridoxine HCl - Biotin - Niacinamide - Hydrolysed yeast protein*) Composed of Vitamin B5, Vitamin PP, ProVitamin B6, Vitamin H, Allantoin, Hydrolysed Yeast Protein, has proven to help reduce sebaceous lipogenesis, inhibit 5-alpha reductase (the enzyme involved in sebum production) and improve the skin's morphological appearance.

USE

Electroporation - add about 5ml of serum into the relative vial. It is advisable to also spread a layer of product on the part being treated.

Ionophoresis - apply the serum directly on the face and let it penetrate.

Treatment - Pure Rebalance Serum can be used as a detoxifying serum as part of a specific cabin treatment process.

Ingredients: Aqua (Water), Propylene glycol, Cetearyl olivate, Sorbitan olivate, Arctium lappa root extract, Hamamelis virginiana (Witch hazel) bark/leaf/twig extract, Laminaria saccharina extract, Niacinamide, Pyridoxine HCl, Panthenol, Allantoin, Biotin, Sodium chloride, Glycerin, Xanthan gum, Lactic Acid, Tetrasodium glutamate diacetate, Phenoxyethanol, Ethylhexylglycerin.

R.F. & STIM EMULSION

Emulsion specific for Face Radiofrequency

Formulation designed for Face Radiofrequency treatments that allows the maximum conductivity of the energy, making it easier to glide the handpiece. The active ingredients in it make it possible to obtain a significant toning and anti-age action.

MAIN ACTIVE INGREDIENTS

Marine Collagen (*Soluble collagen*) - It provides support and strength to the entire skin structure, it performs a compacting, moisturising and elasticising action as well as protection and prevention against skin ageing.

Echinacea Extract (*Echinacea angustifolia extract*) - This offers a re-epithelising, elasticising, toning and antiseptic action.

Ginseng (*Panax ginseng root extract*) - It is known for its revitalising and toning action, and stimulating effect on micro-circulation.

Saint John's Wort extract (*Hypericum perforatum (Saint John's Wort) extract*) - This provides a stimulating and toning action used against the ageing of the skin, to fight dryness, to lighten dark spots, to repair scars (from acne and stretchmarks). It gives skin elasticity, it improves its appearance, it is helpful on varying degrees of wrinkles.

ISO.RF.100

Professional use

250ml • Net Wt. 8.45 fl oz.

SUPPORTING PRODUCTS

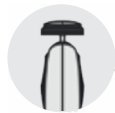

Anti-age gel mask and wellness chromium with hyaluronic acid, ideal for completing the anti-aging program in the cabin.

Professional use

ISO.CHROME.100
[250 ml]

TECHNOLOGIES TO USE IN COMBINATION

**Bipolar
Radiofrequency**

**Multipolar
Radiofrequency**

**Face
Electrostimulation**

**Capacitive
Radiofrequency**

USE

R.F. - apply a generous layer of RF Emulsion on the face and continue with the chosen technology.

Stimol - apply a generous layer of RF Emulsion on the points for muscle stimulation.

Ingredients: Aqua (Water), Glycerin, Cetearyl alcohol, Cetyl alcohol, Decyl oleate, Soluble collagen, Panax ginseng root extract, Echinacea angustifolia extract, Hypericum perforatum extract, Propylene glycol, Sodium polyacrylate, Cetearth-20, Tetrasodium glutamate diacetate, BHA, Parfum (Fragrance), Phenoxyethanol, Ethylhexylglycerin.

Dermatologically tested

R.F.F. EXTREME

Emulsion specific for Face Fractional Radio Frequency

Intensive anti-age emulsion developed to work in synergy with Fractional Radiofrequency technology. Formulated with high molecular weight hydrolysed protein, cross-linked and dehydrated microspheres of hyaluronic acid, marine collagen, functional peptide, vitamin E, it has an effective anti-wrinkle, lifting and plumping action.

MAIN ACTIVE INGREDIENTS

Marine Collagen (*Soluble collagen*) - It provides support and strength to the entire skin structure, it performs a compacting, moisturising and elasticising action as well as protection and prevention against skin ageing.

Hyaluronic acid - It is known for revitalising and toning action, and stimulating on micro-circulation.

Hexapeptide-19 - a synthetic biomimetic peptide with an immediate lifting action, that provides an elasticising action by affecting muscle contractions, therefore mimicking the action of botulinum toxin and reducing wrinkles and expression lines.

Hydrolysed vegetable protein - these constitute a unique hydrating complex able to penetrate deeply in the skin's structure, offering the right water for balance and leaving the skin silky and elastic to the touch.

Sunflower Seed Oil (*Helianthus annuus (Sunflower) seed oil*) - Rich in vitamins and minerals, it nourishes and softens skin that is dry and in need of hydration.

Professional use & Home treatment

ISO.RFF.110

150ml • Net Wt. 5.1 fl oz.

SUPPORTING PRODUCTS

Anti-age activator serum with lifting and plumping effect. Ideal after treatments with Radiofrequency.

Professional use & Home treatment

ISO.RFF.120R
[10 strips 3 ml]

TECHNOLOGIES TO USE IN COMBINATION

Fractional Radiofrequency 37 PIN

Fractional Radiofrequency 12 PIN

Bipolar Radiofrequency

Multipolar Radiofrequency

Capacitive Radiofrequency

USE

Fractional R.F. - apply a generous layer of RFF Extreme to the face or treatment lines.

R.F. - apply a generous later of RFF Extreme on the left side of the face and proceed with the Radiofrequency treatment. Continue by applying the product on the right side.

At home - use the intensive RRF Activator vials to boost the effects of the treatment.

Ingredients: Aqua (Water), Tripleurospermum maritima extract, Palmitoyl hexapeptide-19, Hyaluronic acid, Maris sal (Sea salt), Achillea millefolium extract, Echinacea pallida extract, Hydrolysed vegetable protein, Acacia senegal gum, Glycerin, Propanediol, Hydroxyethylcellulose, Xanthan gum, Tetrasodium glutamate diacetate, Citric acid, Phenoxethanol, Ethylhexylglycerin

R.F.F. ACTIVATOR

Intensive Serum post Face Fractional Radiofrequency

Activator is an intensive anti-age serum developed to enhance the result of the treatment with Fractional Radiofrequency. Formulated with high molecular weight hydrolysed protein, cross-linked and dehydrated hyaluronic acid micro-spheres, seaweed, marine collagen, a mixture of functional peptides, vitamin E, it provides an effective anti-wrinkle, lifting and plumping action, also helping to counteract the imperfections of and dark circles and bags under the eye. It leaves the skin soft, nourished and smooth.

MAIN ACTIVE INGREDIENTS

Marine Collagen (*Soluble collagen*) - It provides support and strength to the entire skin structure, it performs a compacting, moisturising and elasticising action as well as protection and prevention off skin ageing.

Hyaluronic acid - It is known for its revitalising and toning action, and stimulating effect on micro-circulation.

Tetrapeptide-7 (*Palmitoyl tetrapeptide-7*) - This peptide stimulates the production of hyaluronic acid and native collagen. Particularly used for dark circles and puffiness.

Dipeptide-2 - This Fights dark circles and puffiness under the eyes.

Hexapeptide-19 - a synthetic biomimetic peptide with an immediate lifting action, that provides an elasticising action by affecting muscle contractions, therefore mimicking the action of botulinum toxin and reducing wrinkles and expression lines.

Hydrolysed vegetable protein - these constitute a unique hydrating complex that is able to penetrate deeply into the skin's structure, offering the right water balance and leaving the skin silky and elastic to the touch.

ISO.RFF.120R

Home treatment

10 strips 3ml • Net Wt. 0.1 fl oz.

Open/Close cap

SUPPORTING PRODUCTS

RFF Extreme Emulsion, a specific product for cabin Radiofrequency treatment.

Professional use

ISO.RFF.110
[150 ml]

TECHNOLOGIES TO USE IN COMBINATION

Post Fractional Radiofrequency 37 PIN

Post Fractional Radiofrequency 12 PIN

Post Bipolar Radiofrequency

Post Multipolar Radiofrequency

USE

In cabin - apply the Activator serum with botox-like effect at the end of the treatment with R.F.F or R.F. Suitable as an intensive serum for anti-age face treatments and eye contour treatment (bags and circles)

We recommend 1 weekly cabin session. The serum can be applied at home on a daily basis.

At home - use the intensive RRF Activator vials to boost the effects of the treatment.

Day/night serum - the serum can be applied in the morning for a botox-like effect and improve the appearance of bags under the eyes and dark circles.

Ingredients: Aqua (Water), Coco-caprylate, Propanediol, Hydrolysed vegetable protein, Ethylhexyl palmitate, Tocopherol, Tocopheryl acetate, Sodium hyaluronate, Soluble collagen, Fucus vesiculosus extract, Dipeptide-2, Palmitoyl tetrapeptide-7, Palmitoyl hexapeptide-19, Hesperidin methyl chalcone, Helianthus annuus (Sunflower) seed oil, Glycerin, Cetearyl isononanoate, Cetearyl alcohol, Cetyl palmitate, Glyceryl stearate, Sodium polyacrylate, Ceteareth-12, Ceteareth-20, Steareth-20, Trihydroxystearin, Hexylene glycol, Caprylyl glycol, Propylene glycol, Xanthan gum, Glucomannan, Tetrasodium glutamate diacetate, Parfum (Fragrance), Phenoxyethanol, Ethylhexylglycerin.

LIFTING MASK

100% Biocellulose Mask

100 % ORGANIC BIOCELLULOSE

Biocellulose is a natural fibre, laboratory-grown from small bacteria that convert glucose into cellulose, forming the fibres that make up the fabric of the ready-for-use masks. Originally developed as artificial skin for the treatment of burns and chronic wounds.

MAIN ACTIVE INGREDIENTS

Rejuline - Acetyl decapeptide-3 - Also known as Rejuline, this is a biomimetic peptide that reduces and prevents the formation of expression lines and wrinkles, actively generating new skin cells. It strengthens the of the skin elasticity by inducing the synthesis of collagen and elastin.

Hydrolysed Hyaluronic Acid - While hyaluronic acid is “too big” to be absorbed by the skin thus giving only superficial hydration, its smaller molecular fragments (hydrolysed hyaluronic acid) penetrate into the sub-cutaneous layers, thereby firming the tissues. The low molecular weight allows the skin to absorb it slowly, to perform a more intense hydrating action. It also temporarily fills and smooths small wrinkles.

Quinoa (*Hydrolysed Chenopodium Quinoa seed 100%*) - A natural firming agent with immediate effect. The proteins of quinoa provide compactness and elasticity, while the anti-oxidants help maintain youthful, healthy and luminous skin.

Resveratrol - This is a strong polyphenol effective in protecting the skin against the damaging effects of cell stress. It also has a retinol-like action, with a positive effect on wrinkle depth.

Professional use & Home treatment

ISO.BIOCELL.100

5 x 20ml • Net Wt. 0.68 fl oz.

Synergy complex - a formula containing highly active ingredients that act as vectors and that work synergistically to provide a detoxifying, calming, hydrating and anti-oxidant action

SUPPORTING PRODUCTS

Anti-Age 100% Biocellulose Mask

Professional use & Home treatment

ISO.BIOCELL.200
[5 X 20 ml]

TECHNOLOGIES TO USE IN COMBINATION

Chrome Light Mask to boost the effect.

Post cabin treatment with technologies.

USE

In cabin - apply the Anti-age biocellulose mask at the end of the cabin anti-age process, which repairs, restructures and nourishes.

Session and leave-on time - we recommend 1 weekly cabin session. Leave on for 15 to 20 min.

Treatment - to achieve a better result it is advisable to use the Lifting Mask (ISO.BIOCELL.100) at home as well, alternating it with the Anti-Age Mask (ISO.BIOCELL.200) for a more complete effect.

Anti-age mask day/night - the biocellulose can be applied morning and evening, longer leave-on time improves the result.

Ingredients: Aqua (water), aloe barbadensis leaf juice, butylene glycol, dimethyl isosorbide, sodium pca, pullulan, zinc pca, hydrolysed chenopodium quinoa seed, hydrolysed hyaluronic acid, acetyl decapeptide-3, resveratrol, polygonum cuspidatum extract, ammonium glycyrrhizate, amylopectin, allantoin, urea, beta-glucan, maltodextrin, calcium pantothenate, pyridoxine hcl, cyclodextrin, sodium ascorbyl phosphate, xanthan gum, phenoxyethanol, chitosan, saccharomyces/copper ferment, saccharomyces/iron ferment, saccharomyces/magnesium ferment, saccharomyces/silicon ferment ferment filtrate, saccharomyces/zinc ferment, propylene glycol, ethylhexylglycerin, pentyleneglycol, tocopheryl acetate, glycine, silica, lactic acid.

ANTI-AGE MASK

100% Biocellulose Mask

100 % ORGANIC BIOCELLULOSE

Biocellulose is a natural fibre, laboratory-grown from small bacteria that convert glucose into cellulose, forming the fibres that make up the fabric of the ready-for-use masks. Originally developed as artificial skin for the treatment of burns and chronic wounds.

MAIN ACTIVE INGREDIENTS

Palmitoyl tripeptide-38 - This is a tripeptide that is able to stimulate the components of the skin's matrix. It has rehydrating properties, evidently linked to the osmotic effect of collagen, anti-wrinkle action with significant reduction of wrinkle depth, redensifying properties with increased skin thickness and relative increase in elasticity.

Hydrolysed Hyaluronic Acid - While hyaluronic acid is "too big" to be absorbed by the skin producing only superficial hydration, its smaller molecular fragments (hydrolysed hyaluronic acid) penetrate into the sub-cutaneous layers, thereby firming the tissues. The low molecular weight allows the skin to absorb it slowly, to perform a more intense hydrating action. It also temporarily fills and smooths small wrinkles.

Coffee (*Coffee Arabica seedcake extract*) - Coffee Arabica seedcake extract - an effective anti-oxidant, giving hydration and improves the elasticity of the tissues.

Baobab (*Adansonia Digitata fruit extract*) - Rich in vitamins A, D, and E, as well as Omega 3, 6 and 9 essential fatty acids (vitamin F). It performs an antioxidant and hydrating action. It protects the of the skin natural barrier function, it is highly nourishing and protective.

E.G.F. - *Epidermal growth factor (Crocus Chrysanthus)* - Stimulates the natural factor of skin growth, rejuvenating the structure, inverting the ageing process and renews the skin's strength and compactness. It also increases the production of collagen and elastin.

Professional use & Home treatment

ISO.BIOCELL.200

5 x 20ml • Net Wt. 0.68 fl oz.

Synergy complex - *formulation containing principles highly active that act as vectors and they work in synergy with action detoxifying, calming, moisturizing and antioxidant.*

HYDRA FILLER & RESTORING MASK

Hyaluronic Acid • Tonic Natural Complex • Probiotics

100 % ORGANIC BIOCELLULOSE

100% pure biocellulose fibers Mask, can provide an intense moisturizing, soothing and restoring effect to the skin. Rich in numerous and innovative active ingredients including the "Restoring Natural Complex" that exerts an intense soothing and elasticizing action thanks to the mix of plant extracts and peptides of which it is composed. Hyaluronic acid gives an immediate plumping and moisturizing effect and the "pro-biotic-like" can form a protective film on the skin of the face that helps to restore the optimal conditions.

MAIN ACTIVE INGREDIENTS

Probiotic-like Ingredient (*Saccharomyces/Silicon Ferment & Saccharomyces/Magnesium Ferment & Saccharomyces/Copper Ferment & Saccharomyces/Iron Ferment & Saccharomyces/Zinc Ferment*): Protective action, rebalancing and strengthening the cohesion of corneocytes. It is an ingredient that promotes the balance of the skin microbiota and helps to strengthen the barrier function of the skin preventing dehydration.

Restoring Natural Complex: *mix di stratti e peptidi quali; Estratto di Aloe Barbadensis (Aloe Barbadensis Leaf Juice):* Anti-inflammatory, repairing, calming and anti-age. *Rejuline® (Acetyl Decapeptide-3):* Peptide with calming properties and cica trizzanti. Strengthens the elasticity promoting the synthesis of collagen and elastin. *Rhododendron: (Rhododendron Brachycarpum Ex tract):* Rich in flavonoids and quercetin, it has calming and anti-inflammatory properties.

Hyaluronic Acid (Hydrolyzed Hyaluronic Acid): hydrolyzed hyaluronic acid (smaller molecular fragments) penetrates the subcutaneous layers giving firmness to the tissues. The low molecular weight allows the skin to absorb it slowly performing a more intense moisturizing action. It also determines a temporary filling and smoothing out of small wrinkles

Beta Glucan (Beta-Glucan): Its ability to stimulate the production of fibroblasts makes it a good adjuvant in anti-aging treatments. Helping the healing process, it is also added to dermatological products dedicated to the care of delicate skin.

Allantoin (Allantoin): it is a multi-active compound as it has moisturizing, soothing, repairing, anti-inflammatory and antioxidant properties. It is also an effective skin protector.
