

BODY

BODY

Specific products to optimize the result of Electroporation, Radio Frequency and Oxygen. The serums and emulsions allow you to act on the imperfections caused by cellulite, improve the hydration and elasticity of tissues, nourish and tone the skin for an optimal for an optimum equipment.

Dermatologically tested
at the University of Ferrara

DRENA TONE GEL

Conductive gel Cellulite and Adipose tissue

*cellulite: adjuvant in the treatment of imperfections caused by cellulite

Specific conductive gel formulated to intensify the effect of the treatments with the devices, rich in precious and innovative active ingredients that fight the imperfections of cellulite and the accumulation of adipose tissues.

MAIN ACTIVE INGREDIENTS

Ginseng (*Panax ginseng root extract*) - It is known for revitalising and toning action, and stimulating effect on tissue metabolism. In cosmetics, Ginseng has the capacity to improve the elasticity of the skin and promote hydration.

Fenugreek (*Trigonella foenum graecum fruit extract*) - This helps improve the imperfections caused by cellulite thanks to the draining effect. It offers firming properties for mature or stressed skin, leaving it more elastic and toned.

Horsetail (*Equisetum arvense extract*) - Thanks to its considerable salt mineral content, it provides a remineralising action, aiding the formation of elastic fibres. Suitable for stretchmarks, accumulated adipose tissue, it fights unsightly orange peel skin and sagging.

Kigelia (*Kigelia africana fruit extract*) - performs a firming, toning and elasticising effect. This helps nourish the epidermal and dermal layers, it fights oxidative stress caused by free radicals and inflammatory phenomena and leaves the skin more elastic and toned.

Peptides obtained from Pea Extract (*Pisum sativum (Pea) extract*) - Pea extract concentrated in a peptide that helps protect and repair the protein of the skin. It strengthens skin tone and elasticity. It counteracts the degradation of the elastic fibre of the skin and acts with a tensor effect on the tissues.

ISO.TONE.200

Professional use

1000ml • Net Wt. 33.8 oz.

CELL LIPO GEL

Conductive gel Cellulite and Adipose tissue

*cellulite: adjuvant in the treatment of imperfections caused by cellulite

Specific conductive gel formulated to intensify the effect of the treatments with the devices rich in precious and innovative active ingredients that fight the imperfections of cellulite and the accumulation of adipose tissues.

MAIN ACTIVE INGREDIENTS

Guaranà (*Paullinia cupana*) - Ideal for fighting the imperfections of *cellulite and localised adipose tissues. Rich in tannins, caffeine, vitamins and mineral salts, it has energising, toning and stimulating properties.

Green Tea (*Camelia Sinensis Extract*) - Remarkable antioxidant property that translates into a protective action of the micro-circulation. The theophylline in it helps lipolysis and drainage of excess liquids.

Centella Asiatica (*Centella asiatica extract*) - Provides a draining and adjuvant action for the treatment of the imperfections of cellulite, it improves the function of micro-circulation and skin elasticity (stretchmarks, wrinkles).

Fucus (*Fucus vesiculosus extract*) - Favours the exchange of liquids and offers a reducing, toning and stimulating action. The extract of this brown seaweed, comprised mainly of mucilage, mineral salts, iodine, proteins and amino acids, performs a good hydrating, emollient, softening and protective action.

Horse Chestnut (*Aesculus hippocastanum*) - The extract, obtained from the seeds, is comprised of an Aescin-rich phytocomplex which reduces capillary permeability, increasing strength, elasticity and improving lymphatic drainage.

RF BODY EMULSION

Body emulsion for treatment with Radiofrequency

Specific conductive gel formulated to intensify the effect of the treatments with the devices rich in precious and innovative active ingredients that fight the imperfections of cellulite and the accumulation of adipose tissues.

MAIN ACTIVE INGREDIENTS

Kigelia (*Kigelia africana fruit extract*) - This performs a firming, toning and elasticising effect. This helps nourish the epidermal and dermal layers, it fights oxidative stress caused by free radicals and inflammatory phenomena and leaves the skin more elastic and toned.

Horsetail (*Equisetum arvense extract*) - Thanks to its considerable salt mineral content, it provides a remineralising action, aiding the formation of elastic fibres. Suitable for stretchmarks, accumulated adipose tissue, it fights unsightly orange peel skin and sagging.

Centella Asiatica (*Centella asiatica extract*) - This stimulates blood circulation, elasticising and draining action. On a dermo-cosmetic level it performs an adjuvant action in treating the imperfections of cellulite.

Marine Collagen (*Soluble collagen*) - It provides support and strength to the entire skin structure, it performs a compacting, moisturising and elasticising action as well as protection and prevention against skin ageing.

ISO.RF.500

Professional use

500ml • Net Wt. 16.9 oz.

TECHNOLOGIES TO USE IN COMBINATION

Bipolar RF

Multipolar RF

Shock Wave

Capacitive RF

USE

In cabin - apply the RF emulsion to the area to be treated with radiofrequency, this allows 100% of the energy to be transmitted, allowing the handpiece to glide, and provide elasticity to the tissues.

Ingredients: Aqua (Water), Glycerin, Cetearyl alcohol, Cetyl alcohol, Decyl oleate, Soluble collagen, Centella asiatica extract, Equisetum arvense extract, Kigelia africana fruit extract, Propylene glycol, Sodium polyacrylate, Cetearth-20, Tetrasodium EDTA, BHA, Parfum (Fragrance), Phenoxyethanol, Ethylhexylglycerin.

Dermatologically tested
at the University of Ferrara

R.F. & ENDOMASSAGE OILGEL

Synergistic complex for Endomassage & Radiofrequency

Specific formula designed for the synergistic use of Radiofrequency & Endomassage. OILGEL is used to combine optimal conductivity with gliding, it contains Collagen and Hyaluronic Acid which perform a compacting, hydrating and elasticising action.

MAIN ACTIVE INGREDIENTS

Marine Collagen (*Soluble collagen*) - It provides support and strength to the entire skin structure, it performs a compacting, moisturising and elasticising action as well as protection and prevention against skin ageing.

Hyaluronic acid - It provides an anti-age, hydrating, soothing and smoothing action. It gives skin a younger and more relaxed appearance.

Iodide Compound (*tea-hydroiodide*) - an organic iodine molecule purified through recrystallisation, free of elementary iodine, free of cutaneous enzymotoxic activity, that is used in the local treatment of imperfections caused by "cellulite" and/or adipose tissue. Unlike other iodine derivatives, it does not stimulate hormones, rather, it acts topically to fight the accumulation of adipose tissue.

ISO.RFOIL.100

Professional use

500ml • Net Wt. 16.9 oz.

TECHNOLOGIES TO USE IN COMBINATION

Endodermal + RF

Manual massage

USE

In cabin - apply OilGel on the area to be treated, if used with endomassage + RF a minimum quantity is necessary to avoid overloading the handpiece filters. The formula allows both excellent conductivity and glide.

Ingredients: Glycerin, Propanediol, TEA-hydroiodide, Soluble collagen, Hyaluronic acid, Aqua (Water), Ethylhexylglycerin, Caprylyl glycol, 1,2-Hexanediol, Polyacrylamide, C13-14 isoparaffin, Laureth-7, Tropolone.

at the University of Ferrara

RESOLUTION BODY CELL ELECTROPORATOR

Specific Serum for Electroporation

Liquid crystal serum with specific adjuvant action of the treatment for imperfections caused by cellulite and adipose tissue, thanks to the active ingredients that it contains. To be used with electroporation, it allows the vehiculation of functional substances.

MAIN ACTIVE INGREDIENTS

Phosphatidylcholine - This is made up of essential fatty acids which subcutaneous lipid-like chemical-physical characteristics that facilitate absorption through the skin. It provides a booster action of the active ingredients, facilitating vehiculation. It accelerates the break down of fats.

Guaranà (Paullinia cupana) - Ideal for fighting the imperfections of cellulite and localised adipose tissues. Rich in tannins, caffeine, vitamins and mineral salts, it has energising, toning and stimulating properties.

Micro-lipids of Caffeine, Ivy, Seaweed (caffeine - *Hedera helix* (Ivy) leaf/stem extract, *Laminaria digitata* extract) - They provide a lipolytic action to fight the imperfections of cellulite, activating microcirculation, regulating capillary permeability. In the micro-lipid form they have a similar structure to cell membranes, prolonging their bioavailability, offering better absorption and diffusion on the skin.

Centella Asiatica (*Centella asiatica* extract) - This stimulates blood circulation, elasticising and draining action. On a dermo-cosmetic level it performs an adjuvant action in treating the imperfections of cellulite.

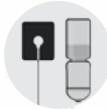

ISO.POR.500

Professional use

250ml • Net Wt. 8.45 oz.

TECHNOLOGIES TO USE IN COMBINATION

**Body
electroporation**

USE

In cabin - pour the serum into the relative ampoule/vial in the electroporator.
The serum can also be used for specific applications in some areas based on need.

Ingredients: Aqua (Water), Propylene glycol, Cetearyl olivate, Sorbitan olivate, Centella asiatica extract, Hedera helix (Ivy) leaf/stem extract, Paullinia cupana seed extract, Laminaria digitata extract, Phosphatidylcholine, Caffeine, Sodium chloride, Lecithin, Glycerin, Xanthan gum, Tetrasodium glutamate diacetate, Phenoxyethanol, Ethylhexylglycerin.

Dermatologically tested
at the University of Ferrara

RESOLUTION BODY TONE ELECTROPORATOR

Specific Serum for Electroporation

Liquid crystal serum with specific toning action thanks to the active ingredients that it contains. To use with electroporation, allowing the vehiculation of the functional substances.

MAIN ACTIVE INGREDIENTS

Kigelia (*Kigelia africana fruit extract*) - This performs a firming, toning and elasticising effect. This helps nourish the epidermal and dermal layers, it fights oxidative stress caused by free radicals and inflammatory phenomena and leaves the skin more elastic and toned.

Horsetail (*Equisetum arvense extract*) - Thanks to its considerable salt mineral content, it provides a remineralising action, aiding the formation of elastic fibres. Suitable for stretchmarks, accumulated adipose tissue, it fights unsightly orange peel skin and sagging.

Peptides obtained from Pea Extract (*Pisum sativum (Pea) extract*) - Concentrated in a peptide that helps protect and repair the skin's proteins. It strengthens skin tone and elasticity. It helps fight the break down of the skin's elastic fibres, maintaining the tone of the treated areas. It provides a firming effect on the tissues, strengthening the skin's tone and elasticity.

Ginseng (*Panax ginseng root extract*) - It is known for its revitalising and toning action, and stimulating effect on tissue metabolism. In cosmetics, Ginseng has the capacity to improve the elasticity of the skin and promote hydration.

Echinacea Extract (*Echinacea angustifolia extract*) - This offers a re-epithelising, elasticising, toning and antiseptic action.

ISO.POR.550

Professional use

500ml • Net Wt. 16.9 oz.

TECHNOLOGIES TO USE IN COMBINATION

**Body
electroporation**

USE

In cabin - pour the serum into the relative ampoule/vial in the electroporator.
The serum can also be used for specific applications in some areas based on need.

Ingredients: Aqua (Water), Propylene glycol, Cetearyl olivate, Sorbitan olivate, Centella asiatica extract, Hedera helix (Ivy) leaf/stem extract, Paullinia cupana seed extract, Laminaria digitata extract, Phosphatidylcholine, Caffeine, Sodium chloride, Lecithin, Glycerin, Xanthan gum, Tetrasodium glutamate diacetate, Phenoxyethanol, Ethylhexylglycerin.

ENDODERMIC MASSAGE OIL

MAIN ACTIVE INGREDIENTS

Sweet Almond Oil (*Prunus amygdalus dulcis* (Sweet almond) oil) - Emollient, softening, nourishing and soothing properties for the skin.

Vitamin E (*Tocopherol*) - This provides an anti-oxidant action, protecting the skin against ageing due to the formation of free radicals.

Ginseng (*Panax ginseng* root extract) - Revitalising and toning action, and stimulating effect on tissue metabolism. In cosmetics, Ginseng has the capacity to improve the elasticity of the skin and promote hydration.

Horse chestnut Extract (*Aesculus hippocastanum* (Horse chestnut) extract) - With an anti-reddening, soothing, strengthening and vasoprotective action. It improves the micro-circulation of the skin.

Echinacea Extract (*Echinacea angustifolia* extract) - This offers a re-epithelising, elasticising, toning and antiseptic action.

Grape seed oil (*Vitis vinifera* (Grape) seed oil) - Extracted from grape seeds, it offers remarkable anti-oxidant properties deriving from the phenols and from the vitamin E contained in them. It helps fight the loss of tone and elasticity of the tissues. It also limits water loss and dehydration.

Ozonised Argan Oil (*Ozonized argania spinosa* oil) - Active oxygen is incorporated into Argan oil to help natural cell regeneration and to perform an energising and stimulating action on the tissues.

ISO.OIL.500

Professional use

500ml • Net Wt. 16.9 oz.

TECHNOLOGIES TO USE IN COMBINATION

Endodermal

Manual massage

USE

In cabin - apply Endodermic Massage Oil on the area to be treated, if used with endomassage a minimum quantity is only required, to avoid overloading the handpiece filters. Also excellent for a manual massage rich in active ingredients.

Ingredients: Prunus amygdalus dulcis (Sweet almond) oil, Caprylic/capric triglyceride, Vitis vinifera (Grape) seed oil, Helianthus annuus (Sunflower) seed oil, Dimethicone, Tocopheryl acetate, Panax ginseng root extract, Echinacea angustifolia extract, Aesculus hippocastanum (Horse chestnut) extract, Ozonized argania spinosa oil, BHA, Parfum (Fragrance).

Dermatologically tested
at the University of Ferrara

ULTRASOUND BODY GEL

Active gel with Phosphatidylcholine

Body gel specific for Ultrasound treatment. Rich in active ingredients with lipolytic action, that reactivate micro-circulation and act an adjuvant in the treatment of imperfections caused by cellulite.

MAIN ACTIVE INGREDIENTS

Phosphatidylcholine - This is made up of essential fatty acids with subcutaneous lipid-like chemical-physical characteristics that facilitate absorption through the skin. It provides a booster action of the active ingredients, facilitating vehiculation. It accelerates the break down of fats.

Caffeine - Is an excellent stimulant of micro-circulation. It is therefore an ally in fighting water retention, cellulite* and localised adipose tissue.

Horse Chestnut (*Aesculus hippocastanum*) - The extract, obtained from the seeds, is comprised of an Aescin-rich phytocomplex which reduces capillary permeability, increasing strength, elasticity and improving lymphatic drainage.

Fucus (*Fucus vesiculosus extract*) - for reducing, toning and stimulating action. The extract of this brown seaweed, comprised mainly of mucilage, mineral salts, iodine, proteins and amino acids, performs a good hydrating, emollient, softening and protective action.

Green Tea (*Camelia Sinensis Extract*) - The extract is mainly comprised of polyphenols and xanthinic bases (theophylline). Remarkable antioxidant property that translates into a protective action of the micro-circulation. The theophylline in it helps lipolysis and drainage of excess liquids.

Professional use

ISO.GEL.110

500ml • Net Wt. 16.9 oz.

TECHNOLOGIES TO USE IN COMBINATION

**Ultrasound with
Electroporation**

**Ultrasound
Handpiece**

USE

In cabin - apply the gel on the area to be treated, it aids the glide of the ultrasound handpiece and allows correct energy transmission.

Ingredients: Aqua (Water), Phosphatidylcholine, Fucus vesiculosus extract, Hedera helix (Ivy) leaf extract, Maris sal (Sea salt), Camelia sinensis leaf extract, Aesculus hippocastanum (Horse chestnut) extract, Caffeine, Laminaria digitata extract, Kigelia africana fruit extract, Equisetum arvense extract, Acacia senegal gum, Glycerin, Propylene glycol, Hydroxyethylcellulose, Xanthan gum, Lecithin, Caprylyl glycol, Glyceryl caprylate, Tetrasodium glutamate diacetate, Phenoxyethanol, Ethylhexylglycerin.

Dermatologically tested
at the University of Ferrara

FANGO CELL INTENSIVE

Cream Mud - White Clay

Intensive cell mud, it contains WHITE CLAY that contributes to the detoxifying and draining action enriched by the precious active ingredients which include Dead Sea Salt which, through osmotic action, helps remove excess liquids, and FENUGREEK to recompact the tissues. White clay is particularly suited for the most sensitive skin.

MAIN ACTIVE INGREDIENTS

White Clay (Kaolin) - Rich in mineral salts that are able to improve the vital functions and activate tissue defence processes. It contributes to the detoxifying and draining activity. Applying the clay spurs an osmotic mechanism whereby the toxins in the cell liquid are absorbed by the clay pack, which, on the other hand, releases its beneficial mineral ions.

Sea salt (Maris sal) - Dead Sea salts are particularly rich in natural minerals and inorganic substances taken from the depths of the sea. Their main components are: magnesium, bromine, sodium, potassium, chlorine, calcium, iodine, lithium and sulfur that promote the drainage of liquids and improve the elasticity of the capillaries.

Fenugreek (Trigonella foenum graecum fruit extract) - SOSTITUIRE CON: Helps improve the imperfections caused by *cellulite and provides a nourishing and restorative action. It offers firming properties for mature or stressed skin, leaving it more elastic and toned. For the same reasons it is also used on the bust and low neck line, and thanks to its firming effect it counters cellulite* and water retention.

Fucus (Fucus vesiculosus extract)- Favours the exchange of liquids and offers a reducing, toning and stimulating and anti-*cellulite action. Brown seaweed, comprised mainly of mucilage, mineral salts, iodine, proteins and amino acids, performs a good hydrating, emollient, softening and protective action.

Centella Asiatica (Centella asiatica extract) - Stimulates blood circulation, elasticising and draining action. It provides a draining and adjuvant action for the treatment of the imperfections of cellulite, it improves the function of micro-circulation and maintains skin elasticity (stretchmarks, wrinkles).

ISO.MUD.100

FANGO SLIM INTENSIVO

Cream Mud - Green Clay

Fango slim intensivo contains GREEN CLAY, with precious and numerous remineralising and detoxifying properties, enriched with ACTIVE ALGES that regulate lipolysis that regulates lipolysis and GREEN TEA and GUARANA' that perform a slimming and reactivating action.

MAIN ACTIVE INGREDIENTS

Green Clay (*Solum fullonum - Fuller's earth*) - Fuller's earth is one of the purest around. Rich in mineral salts that are able to improve the vital functions and activate tissue defence processes. It provides a repairing, remineralising and draining action on stagnant toxins. It helps heavy legs, visible capillaries and stretchmarks.

Oarweed (*Laminaria digitata powder*) - Contains a very high level of organic iodine that is able to regulate lipolysis, i.e. the enzymatic and metabolic breakdown of lipids inside the adipose cells. It is known for being a good source of iodine, which acts synergistically with other substances, thereby breaking down hypodermal fat deposits and effectively fighting the imperfections of cellulite*.

Ivy (*Hedera helix (Ivy) leaf/stem extract*) - Ivy is rich in saponins, it is one of the most useful plants for fighting the skin imperfections of cellulite and the inconveniences of oily skin. Ivy extract, rich in saponins, has a strong cosmetic toning action on all parts of the body that are prone to sagging and losing tone.

Green Tea (*Camelia Sinensis Extract*)- The extract is mainly comprised of polyphenols and xanthinic bases (theophylline). It has a remarkable antioxidant property that translates into a protective action of the micro-circulation. The theophylline in it helps lipolysis and drainage of excess liquids.

Guaranà (*Paullinia cupana*) - Ideal for fighting the imperfections of cellulite and localised adipose tissues. Rich in tannins, caffeine, vitamins and mineral salts, it has energising, toning and stimulating properties.
