Infinity Body Shape

The Art of Remodeling

Infinity Body Shape

The Art of Remodeling

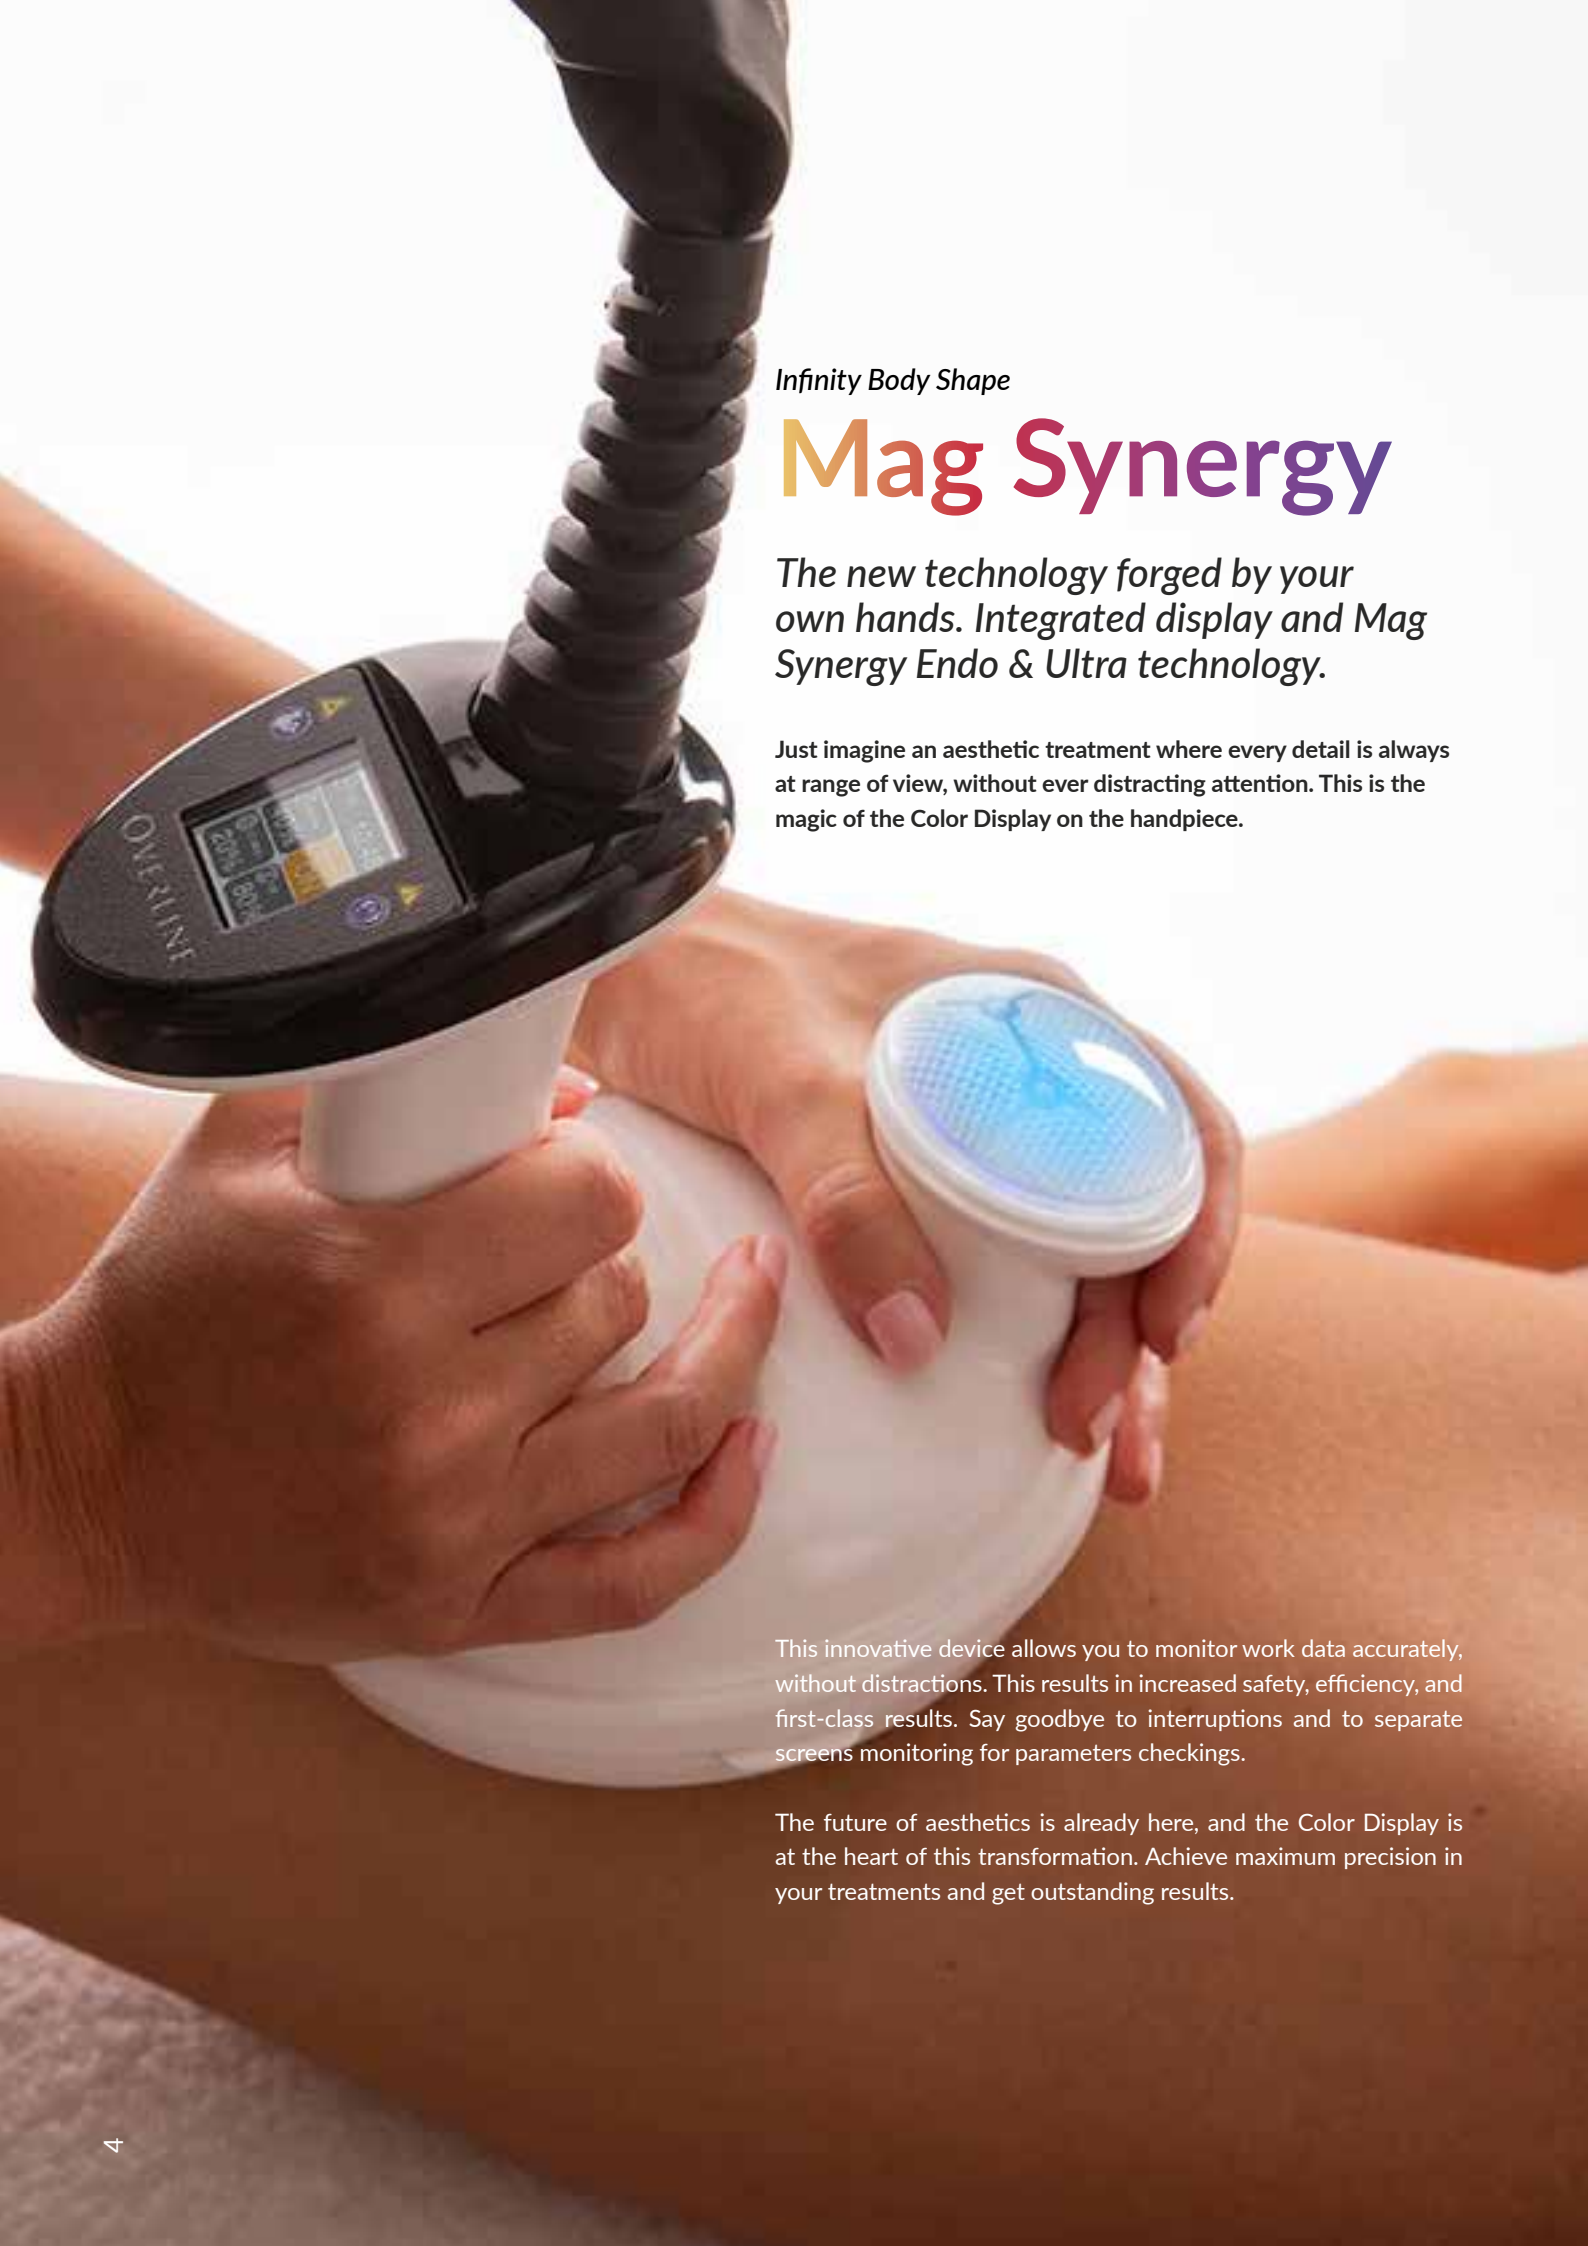

The top of versatility and effectiveness for amazing results.

A cutting-edge equipment, which uses a mix of effective technologies to slim the silhouette, and can be used synergistically or individually thanks to special handpieces.

It allows reducing, elasticizing, toning, modeling and draining. Thanks to the stimulating action of LLLT, it works in a direct, targeted and non-invasive way on the cell membrane, promoting the exchange and elimination of fat in adipose cells.

This equipment is also provided with Endomassage technology for a draining action, Ultrasound 1MHz for a slimming action, Electrolipolysis to tone, Radiofrequency with EMS technology (Electrical Muscle Stimulation) for collagen stimulation activity, Electroporation for a transdermal delivery of active ingredients, and Chromo-frequency for a rebalancing activity. Being a complete technology, it also uses handpieces dedicated to facial treatments, for a total look offer to every customer.

**imperfections caused by cellulite*

Infinity Body Shape

Mag Synergy

The new technology forged by your own hands. Integrated display and Mag Synergy Endo & Ultra technology.

Just imagine an aesthetic treatment where every detail is always at range of view, without ever distracting attention. This is the magic of the Color Display on the handpiece.

This innovative device allows you to monitor work data accurately, without distractions. This results in increased safety, efficiency, and first-class results. Say goodbye to interruptions and to separate screens monitoring for parameters checkings.

The future of aesthetics is already here, and the Color Display is at the heart of this transformation. Achieve maximum precision in your treatments and get outstanding results.

Magnetic **Ultra & Endo**

INTEGRATED DISPLAY - DOUBLE HANDLE
DUAL FUNCTION - MULTIPLE SYNERGIES

Mag Synergy Endo

Revolutionary synergy, specific for the imperfections of **cellulite***, **fat** and **loose skin**.

A revolutionary handpiece designed to make body treatments more effective and visible. The ergonomics of this handpiece has been designed to allow the operator to hold it comfortably, without fatigue, thus focusing only on beauty path and programmed objectives. Synergy is synonymous with results: the combination of different energies makes the work on the body more targeted and incisive, making the result visible from the first applications. The dynamic Endomassage with rollers,

which has always been the protagonist in the modeling treatments of the silhouette, is combined with the application of Multipolar RF, NIR and LLLT technology, together they stimulate the collagen fibers to actively react, and contribute to a reduction in body fat and a reduction of imperfections caused by cellulite. The Chromo-frequency completes this dynamic process, and through the vibration of the colors generates additional energy available to the cells.

Endo Black Massage

Pulsed Endomassage with intense and deep action

Endo Light Massage

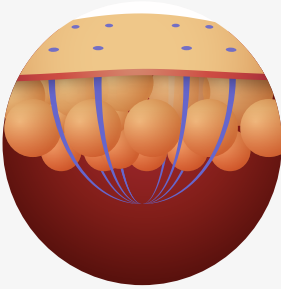

Continuous Endomassage, drainage, and stimulation of the connective tissue

Endo Soft Massage

Continuous Endomassage, gentle drainage

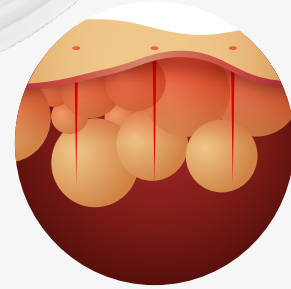

RADIOFREQUENCY

RF treatments are used as a method to provide heat to deeper tissues thanks to the endogenous action of RF, with the aim of increasing collagen production and stimulating circulation, and affecting the release of fat deposits from the tissues.

VACUUM

It refers to the concept of Vacuum therapy, that is, it exploits the properties of negative pressure to obtain a response from tissues in terms of better drainage. This treatment is particularly effective to eliminate cellulite* because it can facilitate the disposal of skin fat, with a kind of mechanical lymphatic drainage.

LASER LLLT

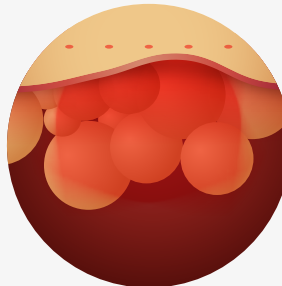

980nm + 630nm

(Low Level Laser Treatment) By generating photostimulation, its effects act on toning and firming, reduce oxidative stress, improve cellular metabolism, and reduce inflammation.

ENDODERMIC MASSAGE

The dynamic endomassage with rollers, through different applicators, allows a real modeling of body shapes, generates a powerful lymphatic drainage, and the mobilization of the connective tissue, improving blood perfusion.

NIR

Near to InfraRed, it uses infrared rays capable of interacting with water, heating the tissue, reactivating microcirculation and stimulating the production of new collagen.

all rollers are easily removable and washable

* imperfections caused by cellulite.

Body Shape and its Versatility

Choose the right configuration for you.

One of the most innovative equipment ever, it offers unprecedented versatility in the field of professional aesthetics. The Body Shape has been designed with the needs of beauty professionals and wellness centers in mind. What makes **Body Shape** so outstanding is its custom configuration capability with additional technologies, creating unique synergies to optimize each type of treatment.

MODELING

Basic configuration with Mag Endo handpiece, with action aimed at modeling, drainage and tissue regeneration.

CONTOUR

Mag Endo

+

Mag Ultra

Synergy aimed at the treatment of cellulite* and fat, drainage, muscle toning and tissue regeneration.

REDUCTION

Mag Endo

+

Mag Ultra

Techno Wave

Action aimed at the dissolution of localized fat, cellulite* amelioration, drainage, and tissue stimulation.

BODY LIFT

Mag Endo

+

Multipolar RF

Bipolar RF

Action aimed at the compaction of collagen, both superficial (Bipolar RF) and deep (Multipolar RF), to achieve a real skin lifting effect. Promotes neocollagenogenesis for a long-lasting result.

Effectiveness and surprising results also on the Face

Body Shape has been designed to also integrate handpieces dedicated to the treatment of the face.

One of the distinctive features of **Body Shape** is its modularity also for facial care, making it the most complete equipment ever.

This means that you can add and integrate different technologies and applicators, to adapt the equipment to the specific needs of each customer.

Add to Body Shape...

Modeling configuration or one of the preset body configurations, Contour, Reduction or Body Lift:

+

FACE STIM

RF EMS
(muscle stimulation)

Vacuum

Ideal for increasing blood perfusion, lifting effect, increased muscle tone.

+

FACE LIFT

RF Multipolar

RF Bipolar

Action aimed at the facial lifting effect. Compaction of superficial collagen (BIPOLAR RF) and deep collagen (MULTIPOLAR RF). Promotes neocollagenogenesis for long-lasting effects.

+

VOLUDERM

37 pin Fractional RF

12 pin Fractional RF

Action aimed at increasing the density of collagen in the tissues. Stimulates the production of collagen and elastin in deeper layers, ensuring long-term results.

Now get comfortable, we'll give you the mean to travel...

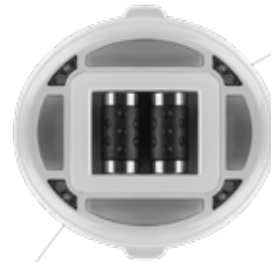

All-in

The **All-in** option certainly represents an extraordinary step forward in the evolution of the **Body Shape** equipment.

Body Handpieces

Mag Synergy Ultra

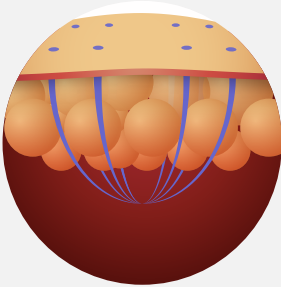

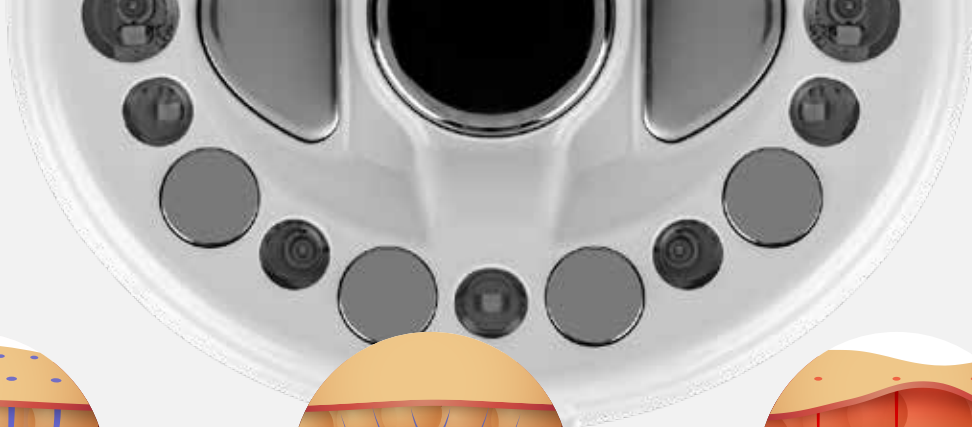

Discover the interchangeable magnetic base with **Ultra-reshaping synergy.**

A revolutionary handpiece with amazing performance designed to improve the most common imperfections that afflict the female and male silhouette. The combined application of Ultrasound, Multipolar Radiofrequency, EMS technology and Electroporation aims to activate all those biological mechanisms that can revitalize tissues, improving the imperfections

caused by fat and cellulite, promoting drainage, enhancing the activity of muscle contraction and reactivating the production of collagen. The process of tissue photobiostimulation is completed by combining the specific infrared source of the LLLT technology and the Chromo-frequency technology.

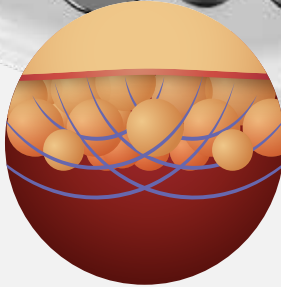

RADIOFREQUENCY
ULTRASOUND
LASER LLLT 980nm + 630nm
MODELING WAVE
DERMO INFUSION

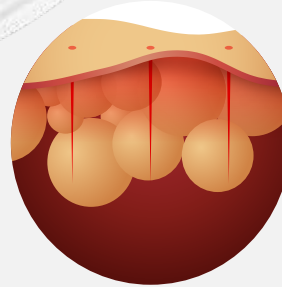

RADIOFREQUENCY

RF treatments are used as a method to provide heat to deeper tissues thanks to the endogenous action of RF, with the aim of increasing collagen production and stimulating circulation, and affecting the release of fat deposits from the tissues.

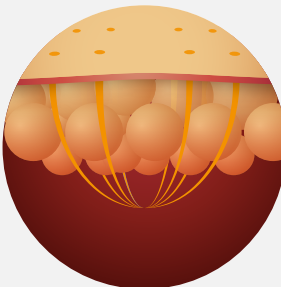

ULTRASOUND

Ultrasounds are waves that propagate at a certain speed based on the density of the tissue. Normally used for common blemishes caused by cellulite* and fat accumulation. It's important to remember that the lower the power, the greater the penetration.

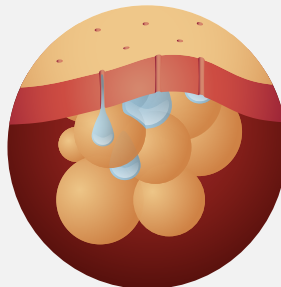

LASER LLLT

980nm + 630nm (Low Level Laser Treatment) By generating photostimulation, its effects act on toning and firming, reduce oxidative stress, improve cellular metabolism, and reduce inflammation.

MODELING WAVE

EMS (electromyostimulation) is a technique of induction of muscle contraction through special and different electrical impulses. In addition to working directly on improving muscle tone, when combined with other technologies improves drainage and promotes increased blood supply to tissues.

DERMO INFUSION

Electroporation is a treatment that promotes the penetration and enhances the delivery of dermocosmetics in the deep layers of the dermis, allowing them to act directly and immediately.

* imperfections caused by cellulite.

Techno Wave

A very sophisticated handpiece, which will allow you to achieve results never seen before.

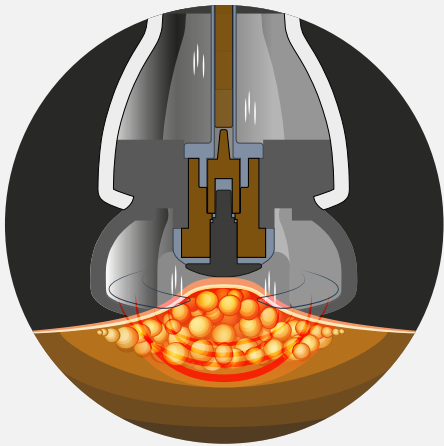

Thanks to internal tests* on a small sample of people, we noticed a constant reduction in the overall body measurements, and above all, a redefinition of the main imperfections.

We will see the body shaping and adapting perfectly, thanks to the extraordinary synergy between the Shock Wave, the Multipolar Radiofrequency, the Vacuum, and the LLLT (Low Level Laser Treatment).

It will be possible to work in areas such as the leg in its entirety up to the ankle, on the sides of the abdomen to create tension and make the customer feel better, and also treat the shoulders for a relaxing action.

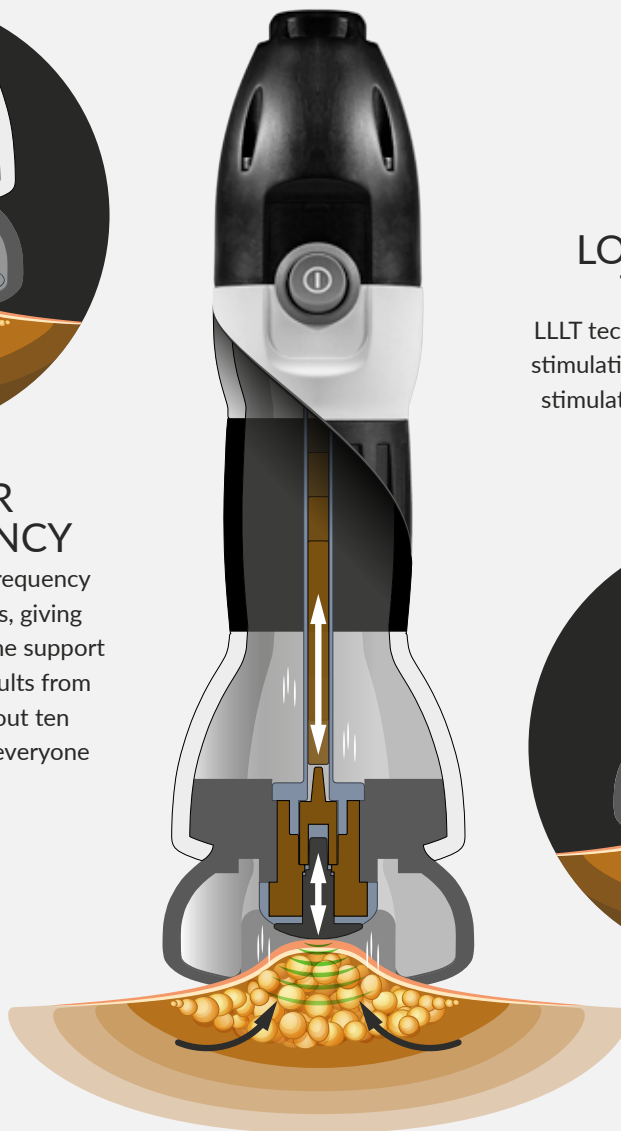

The principle behind this handpiece is the combination of various energies to achieve a common goal, obtain tangible results, and surprise in expectations. The goal we have set out with this technology is to defeat the imperfections caused by cellulite and fat deposits that afflict so many people.

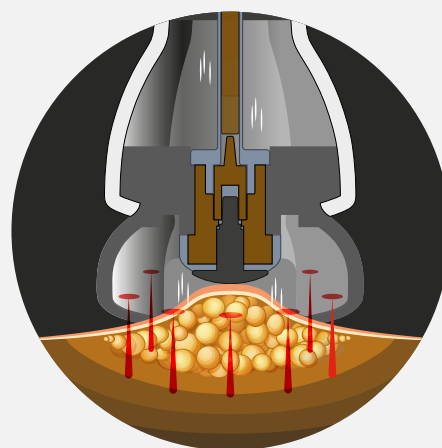

MULTIPOLAR RADIOFREQUENCY

The combination with Radiofrequency stimulates the Collagen fibers, giving flexibility and extensibility to the support fibers. It allows you to get results from the first sessions, and in about ten sessions the result will leave everyone surprised.

LOW LEVEL LASER TREATMENTS

LLLT technology, a laser dedicated to the stimulation of biological processes and to stimulate the production of energy that stimulate the muscles.

SHOCK WAVE + VACUUM

The Shock Wave and the Vacuum in combination act at a localized level (on the fold created thanks to the Vacuum) performing a specific action of redistribution of tissues, making them smooth and soft. The fold allows us to work carefully and accurately, offering the possibility to act on imperfections of medium/large entity, or small and focused.

Face Radiofrequency

Counteracts imperfections.

BIPOLAR RF

Regenerating Action

This treatment with an extraordinary lifting effect counteracts skin relaxation. By raising the temperature of the connective layer using heat, fibroblasts begin to produce new collagen. Thanks to this effect wrinkles and signs of aging will be attenuated and the face will be naturally rejuvenated. The results become constant after a few months of treatment.

MULTIPOLAR RF

Regenerating Action

Multipolar Radiofrequency is a non-invasive method to restore firmness to the skin, give firmness to the face, and reshape the oval of the face. This technology, which exploits the principle of endogenous heat, generates an increase in the temperature of the tissue, resulting in a fibroblasts stimulation reaction, called to greater efficiency in the production of Collagen and Elastin accordingly.

RADIOFREQUENCY + EMS

Toning Action

The combined application of Radiofrequency and Electric Muscle Stimulation allows to warm the tissues in depth, to tone and elasticize the collagen fibers, and at the same time improves muscle tone through micro-contractions.

Fractional RF

Acting on the tissue selectively.

FRACTIONAL RF

Deep Action

Fractional RF allows the homogeneous increase of the temperature at the level of the dermis, determining a thermal action on the collagen fibers, rebalancing both superficial and deep ones, and reorganizing them in a physiological way. This action results in the formation of new collagen and an increase in the volume of the dermis. Fractional RF is a Radiofrequency system able to combine the thermo-resistive stimulation for the plastic remodeling of the dermis with the correction of texture irregularities, thus leading to full-thickness rejuvenation of the skin.

37 PIN FRACTIONAL RF

Deep Wrinkles

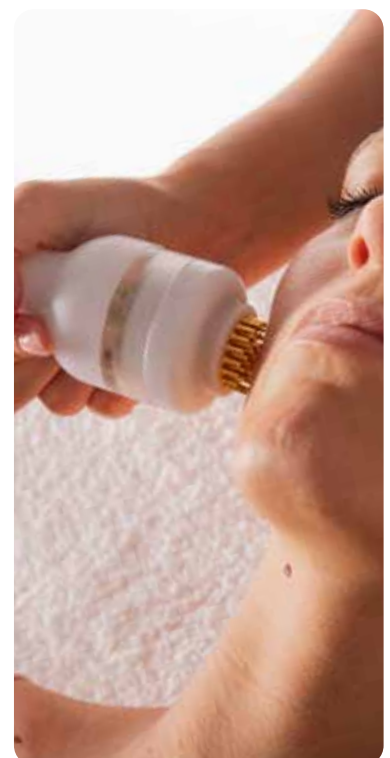

The circular handpiece designed by Overline laboratories allows to concentrate the action of Fractional Radiofrequency, obtaining excellent results on wrinkles from the first sessions.

12 PIN FRACTIONAL RF

Targeted Action

The specific applicator creates a targeted action, focusing the action directly on the skin or stretch marks, to stimulate the regeneration of damaged tissue fibers in the dermis.

Manual radiofrequency

To model & define the Body

For a remodeling and elasticizing effect.

MULTIPOLAR RADIOFREQUENCY

Remodeling Action

Multipolar Radiofrequency is an ideal solution to counteract signs of aging. This technology has the advantage to focus the range of action in a single point, through the 4-pole system. In this way, higher temperatures can be obtained both on the surface and in the deeper layers. The multipolar handpiece also allows to operate at lower powers, and therefore with slightly longer treatment times, without creating discomfort and/or pain to the customer.

BIPOLAR RADIOFREQUENCY

Elasticizing Action

The effect of Radiofrequency is based on the transformation of energy into heat, in fact, often what is perceived does not correspond to the temperature in depth, precisely because of the endogenous action of this energy. Among the fundamental characteristics of Radiofrequency there is the ability to give tone to the tissues, thanks to the heat that stimulates the collagen fibers to degenerate and then regenerate stronger than ever. It restores some physiological functions, and above all, the treatment is very relaxing and does not require post-recovery.

SMART HANDPIECE

Smart Radiofrequency handpiece that help the aesthetic operator to perform the Radiofrequency treatment.

LIGHT INDICATOR

Thanks to the advanced software with which the equipment has been implemented, the SMART handpiece recognizes the selected treatment and lights up, allowing you to identify the handpiece to be used.

INTEGRATED LEDS FOR CHROME-WELLNESS

The integrated LEDs allow you to carry out a treatment of Chrome-Wellness in synergy, which consists in radiating the areas of the body with the vibration of different colored lights, to obtain an aesthetic advantage.

EDUCATIONAL VIDEOS

Within the guided path we also have the opportunity to view some videos that help clarify doubts and improve dexterity. At the forefront as regards the service, Overline Infinity Body Shape has always joined the professional aesthetic operators for a result of excellence. Certain of this strength, inside the Overline Infinity Body Shape have been inserted some educational videos designed to allow the operator to consult, at any time, the correct operating protocols. The teaching videos for the individual protocols and the specific manual skills are easily accessible thanks to the 10" touchscreen. Overline has thought of this solution to allow anyone, in the event of a small forgetfulness, or the inclusion of new operators, to be able to carry out self-training in order to achieve the skills necessary to offer and ensure the best service.

PERFECT PERFORMANCES

Protocols and performances carried out within the Company* respecting the suggested working methods, confirm the synergy between Overline technology and iSol.Beauty cosmetics, ensuring maximum treatment effectiveness.

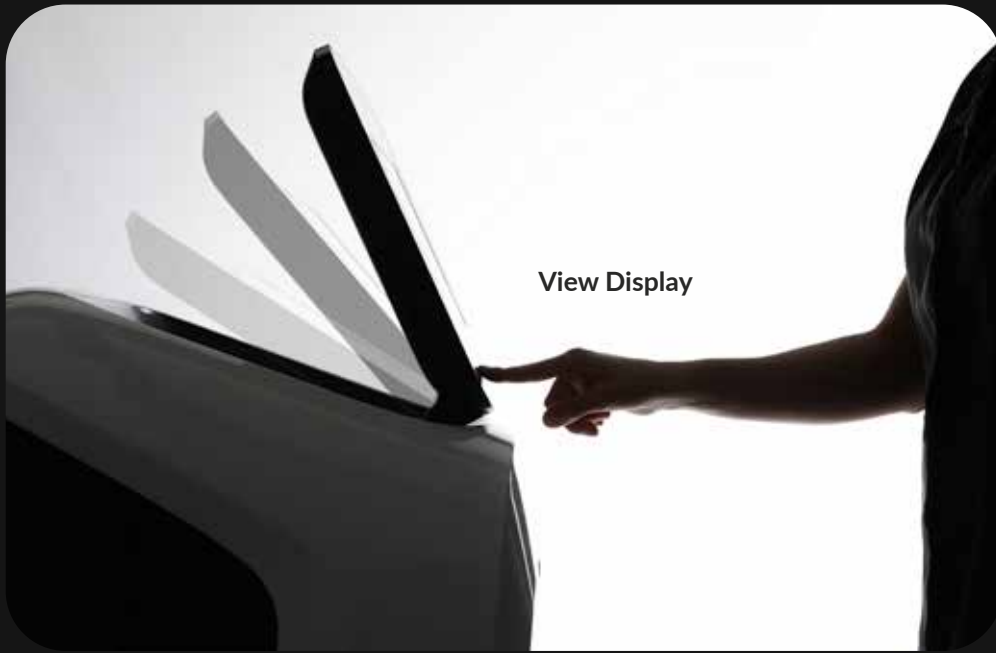

**Protocols and performances carried out within the Company, on a specific sample of people.*

INTUITIVE SOFTWARE

The advanced software of Overline Infinity Body Shape allows to take advantage of numerous and advanced functions and to control the equipment through the 10" monitor,, in a simple, fast and intuitive way. This monitor, as conceived, immediately becomes a fundamental tool to implement the work of professionals. With a few small gestures, the operator is able to carry out a 360° consultation of the specific and physical situation of the customer. You can examine the images, control programs and treatments, have access to the data of your customers. In addition, you can check the situation of the treatment steps to be performed, this gives the opportunity to motivate and involve your customer more. Inside the guided path you can also watch some videos that help clarify doubts and improve dexterity.

INFINITELY

Beautiful

Overline Infinity is an innovative choice for Beauty Institutes. It is the possibility of endless personalized treatments with the synergy of the latest technologies. It is the intuitive interface and ease of use. It is the effectiveness of treatments and the satisfaction of the customer. It is the continuous training support to allow each operator to make the most of all the potential offered by the equipment. It is the safety of using systems rigorously tested, certified, and built in compliance with current regulations. It is a design with sinuous lines, beautiful to see and adaptable to any environment.

Infinity is for those who have a goal and do not want to lose sight of it!

THE DETAILS

The electronically adjustable Monitor of Overline Infinity facilitates easy programming and control of the work, offering a clear view of the treatment to the customer. A large upper drawer and a storage compartment allow you to store materials and cosmetics, while the shaped shelf on the back of the equipment allows the orderly placement of handpieces.

Storage compartment

Large top drawer

Shaped shelf for handpieces

The customization concept for Overline Infinity is very important. Each technology has the advanced Contactless Card reading system, through which the treatment sequence is inserted for each customer, storing the steps taken and those to be carried out, in order to optimize the time.

Contactless Card

36 MONTHS WARRANTY
ZERO
THOUGHTS

Overline Infinity Body Shape equipment is guaranteed from defects of material and workmanship, ex-factory, for a period of 36 months. Activating the warranty validity conditions is very simple, simply fill in all its parts the Warranty form that you find in the package of **Infinity Body Shape**, and send it to Overline no later than 10 days from the date of purchase.

INTEGRATED COSMETICS

The Overline Infinity Body Shape and iSol.Beauty integrated cosmetics combination is synonymous with concrete answers to all aesthetic needs and targeted results. iSol.Beauty cosmetics are designed specifically to work efficiently with the technologies that the equipment is provided with, for maximum operator satisfaction and an excellent beauty experience for the customer.

- Body treatment

1 RF BODY EMULSION
Body Emulsion for RF
 ISO.RF.500
 [500ml]
 Body Emulsion for Radiofrequency
 Innovative formulation designed for treatments with Body Radiofrequency.

Endomassage & RF synergy
OILGEL SYNERGY
2 RF & Massage
 ISO.RFOIL.100
 [500ml]
 Specific formulation specially designed for the synergistic use of Radiofrequency & Endomassage. OILGEL allows to combine optimal conductivity and gliding, contains Collagen and Hyaluronic Acid, which play a firming, moisturizing, and elasticizing action.
- Radiofrequency

3 RF & STIM FACE EMULSION
Face Emulsion for RF and Stimol
 ISO.RF.100
 [250ml]
 Anti-age emulsion for Radiofrequency and Stimol treatments
 Innovative formulation designed for treatments with Face Radiofrequency, allows maximum energy conductivity, facilitates the flow of the handpiece, with a marked toning and anti-aging action.

Fractional RF
4 RFF EXTREME
Anti-age emulsion Pre Fractional RF
 ISO.RFF.110
 [Airless 150ml]
 Formulated with a high molecular weight Protein hydrolysate, cross-linked and dehydrated microspheres of Hyaluronic acid, Marine collagen, a functional Peptide, Vitamin E, performs a powerful anti-wrinkle, lifting and plumping action.
- Masks

5 100% Pure Biocellular Fiber Mask [5 x 20ml]
5 HYDRA FILLER & RESTORING MASK
 ISO.BIOCELL.300
 Can provide an intense moisturizing effect, soothing and restorative of the skin, rich in numerous and innovative active principles including the "Natural Restoring Complex" exerting an intense soothing and elasticizing action thanks to the mix of plant extracts and peptides that make it up.

6 ANTI-AGE MASK
 ISO.BIOCELL.200
 Exclusive anti-aging treatment, enhanced by the mask in pure Biocellulose fibers, whose active ingredients are designed for deeper wrinkles.

7 LIFTING MASK
 ISO.BIOCELL.100
 Lifting & Contouring treatment in a mask of pure Biocellulose. The active ingredients, with lifting and anti-wrinkle properties, have been designed to immediately provide tone, firmness and brightness to the face.
- Conductive gel

8 DRENA-TONE GEL
Conductive gel with toning and reactivating effect with ginseng
 ISO.TONE.200
 [1000ml]
 Specific conductive gel formulated to intensify the effect of treatments with equipment, rich in precious and innovative active ingredients with reactivating, elasticizing and toning effect.

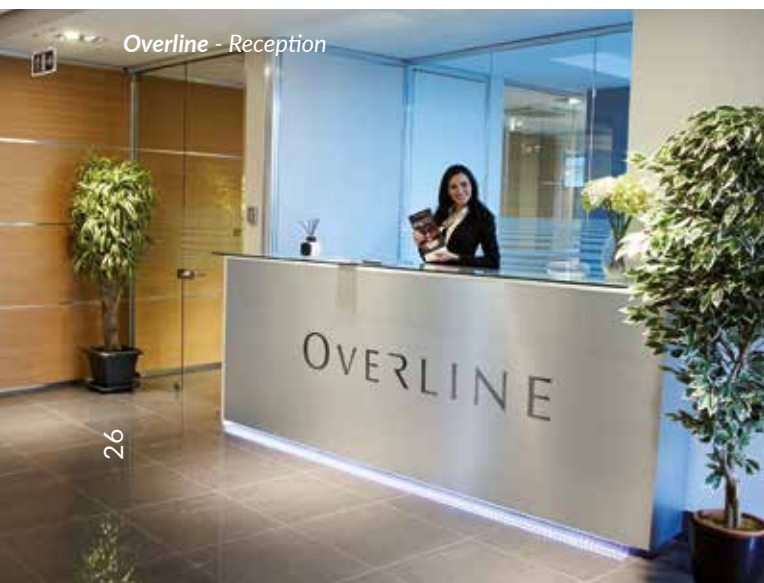

9 LIPO-CELL GEL
Conductive gel, cellulite and adipose tissue, with guarana and green tea
 ISO.DREN.100
 [1000ml]
 Specific conductive gel, formulated to intensify the effect of treatments with the equipment, rich in valuable and innovative active ingredients that counteract the imperfections of cellulite and fat deposits

Always at the service of beauticians

Leading edge and Innovation are the ideal terminologies to identify Overline. A historic Milanese company, undisputed leader in the production and marketing of hi-tech equipment for professional aesthetics.

It was born in 1989 and, since then, it can be simply described “a success story”. A reality that expresses its corporate style through an ethical commitment and a careful and responsible commercial management.

The terminologies used in company information materials to define technologies and characteristics are those that are internationally permitted and commonly used.

Overline - Reception

Overline - Training course

Research & Development

The heart of the company, the innovative Research and Development laboratory is the place where high-performance and easy-to-use technologies provide effective answers to the needs of professional operators of aesthetics. Different, safer and multifunctional systems for the face, body and hair removal.

Made in Italy

A 100% Made in Italy production, offering competitive advantages in terms of performance, safety and customer service. Overline technologies are distributed in the best aesthetic centers and beauty Institutes throughout Italy and in all European countries as well as in South America, Mexico, Africa and Asia.

Certifications

Overline is a trademark of Technology S.r.l., a company that is constantly engaged in research and development of technologies to offer the market of professional aesthetics innovative systems that offer visible results but at the same time respect the maximum safety of the operator and the customer. Today Technology, thanks to its great experience, has obtained important certifications that attest to the full compliance with international regulations and standards in the production of biomedical and electro-aesthetic equipment, and cosmetics. The certifications that make all technologies of the highest level are the following:

ISO 9001 TISO 9001 Represents the certification of the Quality Management System, internationally recognized, ensures that the equipment respects the management system required by the standard for design, production, sales, development and research.

ISO 13485 Certification relating to the Quality Management System for Medical Devices, is a reference standard of Quality within the regulatory procedures governing the design, production and marketing of Medical Devices.

ISO 45001 Concerning the standard for the management of the health and safety of workers.

Made In Italy Technology 

design by mesa.
